

Not Just Fabric, But Solutions Sport Arenas & Large Venues

Air Distribution Concepts® Fabric Duct Solutions for Sports Arenas & Large Venues

Air Distribution Concepts fabric duct systems are the ideal air delivery solution for sports arenas and large venues because they provide uniform, draft-free air distribution across expansive, high-occupancy spaces while maintaining superior comfort and efficiency.

Unlike metal ductwork, fabric systems deliver air evenly along the entire length of the duct, eliminating hot and cold spots, condensation, and disruptive air noise—critical factors in arenas where spectator comfort and athlete performance matter. Lightweight and corrosion-resistant,

Air Distribution Concepts fabric duct installs quickly, adapts easily to architectural constraints, and withstands the demanding conditions of large venues. The result is improved indoor air quality, reduced energy consumption, and a visually clean, customizable solution that performs reliably on a scale.

With the ADC Textile Based Ventilation Engineering Design Program, it provides solutions that you can trust and data that you can view and verify in your design process.

Benefits of using ADC Fabric Dispersion Systems:

- **Uniform air distribution:** Delivers even airflow along the entire duct length, eliminating hot and cold spots common in large, open spaces
- **Draft-free comfort:** Precisely engineered dispersion prevents uncomfortable drafts for spectators and athletes
- **Quiet operation:** Fabric ducts significantly reduce air and mechanical noise compared to metal ductwork
- **Improved indoor air quality:** Consistent air delivery supports better ventilation effectiveness in high-occupancy venues
- **Lightweight & fast installation:** Requires minimal structural support, lowering installation time and cost
- **Durable & corrosion-resistant:** Performs reliably in challenging environments without rust or degradation.
- **Architectural flexibility:** Custom colors, shapes, and layouts integrate seamlessly with arena aesthetics.
- **MADE IN AMERICA**
