Purpose	Consolidates active, numeric-price SKUs from the supplied manufacturer guides into the DIR pricing layout.
Customer price basis	Every DIR Customer Price is MSRP/List Price less 15%, rounded to two decimal places.
Discount percentage	15% for every product row.
Calculation	DIR Customer Price = MSRP/List Price x 85%.
Missing MSRP	Where a guide exposed only VAR/net cost, that amount is used as the MSRP/List Price basis before applying the 15% discount.
Excluded	Change logs, duplicate catalog tabs, EOL/discontinued items, expired limited-stock rows, and quote-only rows without numeric pricing.
Source fidelity	Descriptions, SKUs, prices, source files, and pricing treatment are shown row-by-row on Source Data.
Confidentiality	Several supplied manufacturer guides are marked confidential. Confirm disclosure rights before publishing or posting this PDF.
