ABOUT

I started in **UI/UX design** and moved into **development** over time. Now I work across both — from **Figma** to live, handling design, **animations**, and **custom code**. I've been doing this professionally for 3+ years, with **17 live projects** delivered for agencies and small businesses. I move quickly, and take full ownership of what I deliver. **I speak English, German, Hungarian, and Romanian natively**

BACKGROUND

Self-taught. Studied UI/UX design at Memorisely, Webflow development through Flux Academy and Webflow University. Started with design, got into development because I wanted full control over what I was building. Three years later, that's still what drives the work.
