KEY FEATURES

Every Change Tracked, Every Audit Simplified

Smarteeva's Audit Trail records every modification across every record type in the system. Color-coded visual cues make it immediately clear what was added, changed, or removed. Reviewers can acknowledge and verify changes from a single screen.

01

Color-Coded Changes

Visual cues for immediate understanding of record modifications. Inserts, updates, and deletions are visually distinct at a glance.

02

Unified Record Viewing

See changes across the current record and all related records from one screen. No clicking through multiple pages.

03

Smart Data Decisions

Configure which data changes matter for your organization. Review meaningful changes, not noise.

04

Comprehensive Coverage

Unlimited tracking across all data types. Every field, every object, every modification captured.

Audit Readiness Without the Scramble

When auditors arrive, the worst outcome is not having answers. Smarteeva's Audit Trail means every question about who changed what and when has an immediate, verifiable answer.

Time Savings

Reduce hours spent on data research during audits. Dashboards show record states at any point in time.

Regulatory Adherence

Meet 21 CFR Part 11 and EU MDR requirements for electronic records and audit trails.

Cost-Effective

Lower upfront costs. No costly upgrades or maintenance for audit compliance.

Simple Adoption

Built on Salesforce. Rapid setup and integration into your existing environment.

Acknowledge & Verify

Reviewers can formally acknowledge changes within the system, creating a compliance record.

Any Device Access

Review audit trails from anywhere. Desktop, tablet, or phone.

BUILT ON SALESFORCE

Built on Salesforce, Built for Compliance

Because Smarteeva runs natively on Salesforce, the audit trail inherits enterprise-grade security, role-based access controls, and field-level encryption. No bolt-on audit module.

21 CFR Part 11

Electronic records and e-signatures compliant

EU MDR Ready

Documentation requirements met by default

SOC 2 Type II

50K+

Users across 80+ countries

How Teams Use This

FDA Audit Response

Pull complete change history for any complaint, adverse event, or regulatory submission within seconds.

Internal Quality Reviews

Track who modified risk scores, complaint codes, or investigation conclusions and when.

CAPA Documentation

Full traceability from the original complaint through every investigation step to corrective action.

Training & Accountability

See exactly what each team member modified, supporting training needs and process improvement.

Why Companies Choose Smarteeva

Built on Salesforce

100% native. Enterprise security.
Integrates with your CRM.

AI That's Auditable

Every AI decision has a traceable
audit trail.

Connected by Design

All modules share one data model.

Any Size, Any Market

10-person startup to global top 100.

See Smarteeva In Your Workflow

30 minutes. Your use cases, your data, your regulatory markets. A live walkthrough configured for your team.
