1H26 Results highlights

- **Beneficial EBITDA for 2Q26 rose to PHP23.0b, up 21% YoY (+13% QoQ)**, driven by higher margins attributable to stronger energy market prices, additional capacity from the Caliraya-Botocan-Kalayaan (CBK) Hydroelectric Power Plant Complex and from new solar power plants, which more than offset lower coal plant availability during the period. This resulted to **PHP43.3b beneficial EBITDA in 1H26, up by 27%** compared to PHP34.1b in 1H25.
- **Core net income for 1H26 reached PHP18.0b**. Including FX gains and losses and other non-recurring items, reported net income came in at PHP18.4b, 45% higher than the PHP12.7b recorded in the same period last year.
- During the quarter, AboitizPower commissioned two battery energy storage system (BESS) projects with a combined capacity of 28 MW. AP also broke ground on its Laoag and Cadiz solar power projects, both of which are expected to be completed in 2028.
- Gross interest-bearing debt declined to PHP325.6b as of June 2026, from PHP332.5b at end-December 2025. This brought net debt-to-equity ratio to 1.17x, slightly lower than the 1.27x recorded in December 2025.
