TO WHOM IT MAY CONCERN

As the appreciation of our cooperation we would like to express our satisfaction with company NAFTAMATIKA, s.r.o. , their product – rod pump controller WellSim and last but not least their employees who has been providing us with the high quality technical support and field services.

WellSim rod pump controllers installed on our wells prove their high efficiency and became a valuable part of the integrated automation system bringing oil pump management to higher level. Therefore we are glad to recommend NAFTAMATIKA`s rod pump controller as a reasonable choice to other potential customers within oil field.
