

IDEA App Analytics P2P

Version 2.3

General Requirements

You need an IDEA license to run the IDEA app Analytics P2P and a license for the SmartExporter Desktop Edition to extract data. You will find the installation guides and system requirements for these software solutions in the corresponding “Readme.txt” file in the download package of the software.

IDEA

- IDEA ASCII 12.2 or higher
- IDEA Unicode 12.2 or higher

The app can be run in combination with all IDEA editions (e.g., Standard, Network, etc.).

SmartAnalyzer

SmartAnalyzer is an analysis tool that is integrated in IDEA by default. SmartAnalyzer does not require a separate product license. Every app that can be acquired for use in SmartAnalyzer has its own license.

SmartExporter

SmartExporter 2022 R1 or higher

App Import

The app is displayed and run in SmartAnalyzer, the data analysis tool integrated in IDEA. For a detailed instruction on how to import the app, please refer to the “Installation_Guide_IDEA_App_Analytics_P2P_V2.3.pdf” file included in the app download package.

Note:

- You must first install IDEA before importing the app.
- If you are using an IDEA Network License and Network License Manager is installed on a different machine than the IDEA version, please import the app on the machine which runs IDEA.

Language

It is recommended that you use the English IDEA app Analytics P2P in combination with an English IDEA version.

Required Rights

The app can be imported in IDEA without administrator rights. If you have not yet installed the required IDEA version, please note that all IDEA editions and the related applications require administrator rights to be installed.

Enhancements and Updates

The IDEA app Analytics P2P contains a Standard Import Routine and the corresponding Data Requests for SAP® systems, which can be run using SmartExporter. These elements are subject to continuous development and will be provided to you in the shape of apps or updates for use in the IDEA app Analytics P2P.

Managing the App in the App License Management

The licenses for the IDEA app Analytics P2P are provided via an app-based distribution platform, the App License Management. This web application offers an easy and transparent way to manage your app licenses. The App License Management enables you to assign licenses to users and display a list of all existing licenses and users.
