From individual to enterprise productivity: the real AI challenge.

Copilots make people faster. Not the enterprise. Knowledge stays fragmented across systems, and execution runs blind, through email and chat, with no governance at all.

Adding siloed AI doesn't erase execution blindness. It scales it.

AI-speed operations.
Governance without compromise.
End-to-end execution, enterprise-wide.

Ofelia orchestrates teams, systems and agents, from the first message in Slack to a full business application.

Ofelia Agentic

Conversational AI, governed from Slack and Teams.

One message in Slack. Every team coordinated. No manual follow-up. Ofelia turns every question, every intent, into governed, end-to-end execution.

✓ Instant adoption. No new tool. Enterprise-wide impact.

Bonita BPM

Enterprise-grade BPM, for mission-critical precision.

For operations too complex or too regulated for a generic workflow. Dedicated business applications, from model to production, with full control, audit trails and AI where it helps.

✓ Sovereign by design. No lock-in. Custom at every level.

Two products. One BPA execution engine. One governance layer.

AI from design to execution.
Governance and traceability, throughout.

What makes Ofelia unique.

01 **Fast adoption. Whatever the project.**

Instant in Slack and Teams. Live in weeks for your custom applications.

02 **The full operations spectrum.**

From daily knowledge access to orchestrating your most complex, custom processes.

03 **Enterprise-wide execution.**

Finance, HR, IT, supply chain: one orchestration layer for every team and every system.

04 **Governed AI.**

Human-in-the-loop by design. AI accelerates, humans decide, with a full audit trail at every step.

THREE USE CASES. ONE SUITE.

Built for the way your teams already work.
