Redefining Sensing.
Shape the Future with Us.

InnoSens develops high-precision sensor systems for customers in the automotive and consumer electronics industries. Our products build on many years of expertise in MEMS and ASIC technologies and are developed, tested and qualified across our international locations.

To support our **Marketing & Communications** activities at our German locations, we are looking for a

Working Student / Intern (m/f/d) Marketing – Website, Content & Communications

Your Opportunity

- You will support the development, maintenance and continuous improvement of our corporate website, from structure and content to quality assurance.
- You will create marketing materials such as presentations, brochures, flyers and graphics and contribute your own ideas.
- You will support the creation and updating of product datasheets, ensuring clear and professional presentation.
- You will contribute to content creation for internal and external communication channels, including our website, social media and product communications.
- You will work closely with our engineering teams and gain valuable insights into our international group of companies.
- You will have the opportunity to take ownership of your own smaller projects, if you would like to.

Your Profile

- You are currently enrolled in a degree program in marketing, media, communications, business administration, design, or a comparable field.
- You enjoy working in a structured way and bring motivation and a hands-on mindset.
- Initial experience in content creation, website maintenance, or graphic design is a plus, but not a requirement.
- You have a good sense of clear communication, visual design and professional presentation.
- You enjoy working as part of a team, communicate openly and are eager to develop your skills.
- Good German and English skills complete your profile.

More Than Just a Job

“Made by InnoSens” stands for innovation, quality and reliable collaboration. At InnoSens, you will become part of a small, dedicated team with a direct point of contact and the opportunity to quickly take ownership of your own tasks. At the same time, you will benefit from close collaboration with our engineers and gain insights into the international group of companies we are part of.

You will work in a dynamic environment with short decision-making paths, flat hierarchies and open communication. Flexible working hours, mobile working options and the flexibility to combine your studies with your work at InnoSens give you the freedom you need.

A motivated team will support you in your day-to-day work, share knowledge and give you room to contribute your own ideas. You will have the opportunity to gain hands-on experience in a high-tech company and discover what marketing looks like in a technical environment, working directly with our engineers and close to where innovation happens.

Sounds exciting?
Then let’s find out together if it’s the right fit.
