

Sage 50 Integration

Nuvei + Sage 50

Every payment, **everywhere.**

Nuvei is integrated with Sage 50 to help clients accept credit card and ACH payments and keep payment activity connected to accounting workflows.

Sage recommended solution.

Get paid faster: Offer customers card, ACH, and invoice "Pay Now" options that post back to Sage 50.

Reduce manual work: Keep payments and status connected to your accounting workflow instead of managing payments separately.

Improve security: Use tokenization/vault storage and PCI aligned processing to reduce exposure to sensitive card data.

Better visibility: Use online activity reporting to track payment activity.

What's **included?**

- Native Sage 50 integrated payment processing (credit card payments within the Sage 50 experience).
- Credit card + ACH payments, including integrated ACH processing.
- Tokenization + secure vault storage to store/reuse payment credentials securely.
- Commerce suite Pay Now link with bi-directional sync to Sage 50.
- E invoicing with a "Pay Now" link.
- Online reporting of activity for payment visibility.
- PCI DSS aligned processing for secure card acceptance.
- Faster funding / rapid batch processing (including next day funding messaging).
