

Sage Intacct Integration

Nuvei + Sage Intacct

Every payment, **everywhere**.

Nuvei + Sage Intacct Integrated Payments

Nuvei for Sage Intacct enables B2B organisations to modernise payments with a secure, automated solution. Combined with the Nuvei Commerce Suite, businesses benefit from improved efficiency, faster cash flow, and a seamless payment experience within their ERP.

Sage recommended solution.

Get paid faster

Offer card and easy “pay now” experiences (including anonymous links).

Less manual reconciliation

Reduce switching between systems and minimise manual reporting back to Intacct.

Better customer experience

A brandable portal and configurable notifications/receipts help improve how customers pay.

What’s **included**?

- Credit card inside Sage Intacct (fully integrated, cloud based).
- Anonymous payment links (one time use; no login required).
- Brandable customer payment experience.
- Payments/changes reflected in Intacct in real time; card payment info records back to the ERP.
- Document support: integrates with payment documents (quotes, sales orders, AR invoices) and can attach/display the original ERP document as a PDF.
- Tokenisation for future use (saves tokenised payment information securely).

Three ways to get paid fast in Sage Intacct

Give your customers flexible payment options while accelerating cash flow and reducing AR workload.

Collecting payments should not slow you down. Whether you bill repeat customers, send one-time invoices, or manage high-volume receivables, Nuvei's payment solutions for Sage Intacct give you the flexibility to get paid on your terms and theirs.

Stored cards for recurring payments

Securely vault customer card details directly within Sage Intacct. Card data is tokenised and stored in Nuvei's PCI-compliant vault, never in your systems. When it is time to collect, process payments on behalf of customers directly from your ERP with zero action required on their end.

- **Ideal for:** Subscription billing, repeat customers, scheduled payments.
- **The result:** Faster collections, automated billing cycles, and no sensitive data liability.

Payment Links for quick collections

Embed a payment button or link at the bottom of all document types. Customers simply click and pay by card. No portal login, no phone calls, no friction. You can also enable automated reminder messages for outstanding invoices to prompt payment without manual follow-up.

- **Ideal for:** Invoice payments, statement reminders, one-time transactions
- **The result:** Simplified customer experience, reduced follow-up, and accelerated cash flow.

AR Automation portal for self-service

Offer customers a branded self-service portal where they can view all open invoices synced from Sage Intacct, then pay one or many at once using cards or other enabled payment types.

- **Ideal for:** High-volume receivables, customers with multiple open invoices
- **The result:** Full AR automation, reduced Days Sales Outstanding (DSO), and a modern digital billing experience.

Ready to **streamline** how you get paid?
