

ORACLE®
NETSUITE

Integration

Nuvei + Oracle NetSuite

Every payment, **everywhere.**

Nuvei's NetSuite integration helps merchants streamline payment acceptance and reduce manual effort by enabling in ERP payment processing across NetSuite sales and receivables workflows.

Faster time to cash: Address DSO pressures by streamlining how customers pay.

Less manual work + fewer errors: Reduce fragmented processes and manual data entry by processing payments within integrated NetSuite workflows.

Easier reconciliation: Improve back office efficiency by streamlining payment processing and supporting automated reconciliation.

Stronger security posture: Tokenisation helps reduce exposure to sensitive payment data while supporting ongoing payment operations.

What's **included?**

- Integrated card payments (supports card present chip, contactless and card not present processing).
- Integrated EFT bank transfer processing for NetSuite payment workflows.
