

Microsoft
Dynamics 365

Integration

Nuvei + Microsoft Dynamics 365 Business Central

Every payment, **everywhere.**

Nuvei offers an in ERP payments integration for Microsoft Dynamics 365 Business Central, enabling businesses to accept key payment methods directly within Business Central workflows.

Less manual work: Payments are embedded in Business Central workflows, reducing back office friction and reconciliation effort.

Faster cash application: Pre auth/ capture and payment posting options help streamline order to cash.

Better visibility: Full payment history plus near real time payment information supports faster, informed decision making.

More secure processing: Tokenisation aligned capabilities reduce exposure to sensitive payment data.

What's **included?**

- Credit and debit processing in Business Central (integrated payment interface).
- Tokenised card information to speed future payments and reduce sensitive data exposure.
- EMV integrated terminals for card present transactions (where applicable).
- Pre authorisations + capture (pre authorise on Sales Orders and auto capture at invoice; capture on Sales Orders/Sales Invoices).
- Voids & refunds directly in Business Central.
- Full payment history (credit/debit transactions and authorisations).
- Flexible capture options (capture to leave open on the customer account; capture individual or lump sum via Register Customer Payments).
- Settlement reconciliation support integrated with bank account reconciliation.
