From the ER to the AI strategy room

#1

Thinkers360, Top 50 Global Thought Leaders and Influencers on Healthcare, 2026

Also: Offcall, Top AI Healthcare Voices 2026, #24 · HealthTech Signal Top 100

- 01 Board-certified in emergency medicine, twenty-plus years on the front line, still practicing
- 02 Advisor to the CEO, Phantom Space Corporation. Strategic Advisor, NeuroCare.AI
- 03 Five TEDx talks on healthcare AI and the future of medicine
- 04 AI books with Wiley, Routledge and KDP
- 05 Former member, Singapore Ministry of Health Regulatory Advisory Panel, 2024 to 2026
- 06 Former CEO, Trusted Medical and PRIME Medical Staffing
- 07 LinkedIn Top Voice

Healthcare AI often looks impressive in a demonstration and then stalls inside the clinical workflow. Harvey Castro, MD, MBA, known as DR GPT™, helps leaders close that gap with clarity, safety and measurable results.

Harvey is a board-certified emergency physician who has spent more than two decades where clinical decisions carry immediate consequences. That frontline view shapes every talk. He speaks about what AI can do in a hospital today, where caution still belongs, and what leaders have to change so a pilot becomes daily practice.

Every AI decision in healthcare eventually lands on a patient. I build my talks for the people who have to own that moment.

What your audience leaves with

- Where generative AI creates real clinical and operational value, and where it does not yet
- Why promising pilots fail inside real workflows, and how to prevent it
- A practical lens on safety, governance and physician adoption
- Clear next steps matched to the organization's AI maturity

Education

MD, University of Texas Medical Branch at Galveston. Emergency medicine residency, St. Luke's University Health Network. Physician Executive MBA, University of Tennessee, Knoxville.

Talks built for the people accountable for care

Three signature keynotes and three talks on request, each adapted to the audience's clinical setting, leadership priorities and AI maturity.

01 · SIGNATURE

Accountable Intelligence

Where AI should lead, and where humans stay accountable

As AI moves from suggestion to action inside hospitals, someone still owns the outcome. Harvey helps boards and executives decide which decisions AI can carry, which stay with clinicians, and who answers when a model is wrong. Leaders leave with clear lines of ownership before the next deployment.

02 · SIGNATURE

AI That Survives the Workflow

Why healthcare AI pilots stall, and how leaders move from demo to durable adoption

Workflow, trust, safety, governance, incentives and measurement decide whether an AI project lives past the pilot. Harvey walks leaders through each one with cases from the emergency department.

03 · SIGNATURE

SAFE AI

A physician-led framework for responsible healthcare AI

How to weigh risk, involve clinicians, protect patients, monitor performance and keep a human in charge as AI scales. Drawn from his TEDxBabsonCollege talk.

ALSO AVAILABLE ON REQUEST

04

The Human Advantage

Physician leadership in the age of AI
Judgment, empathy, communication and trust become more valuable as machines improve. A leadership talk for clinical and executive audiences.

05

Before the Emergency

Predictive medicine, digital twins and anticipatory care
How AI, biosensors and continuous monitoring can help clinicians spot deterioration earlier, without overstating what current tools reliably do.

06

Healthcare at the Edge

AI, satellites and distributed technology
Care when expertise, connectivity or infrastructure is limited, from rural clinics to orbit. Informed by his work at Phantom Space.

ON STAGE

A physician voice on world stages

TEDxPurdueU 2025 · Dubai 2025 · International healthcare panel 2026 · Museum of the Future, Dubai · HIMSS24

Selected stages

TEDx · PurdueU, BabsonCollege, Southlake, AWC, Warrenton

IFD 2026 · Lisbon · International Forum of Dermatology, Pierre Fabre

PatientAI Summit 2026 · Houston

HIMSS24 · Orlando

DHAI 2026 · Boston · Mainstage keynote and panel

WIRM World Congress 2026 · San Francisco

AI x Policy Summit 2026 · Richardson, Texas

Invest Digital Health 2024

In their words

"He seamlessly integrated real-world examples and practical insights, leaving attendees inspired and equipped with actionable takeaways."

Uli K. Chettipally, MD, MPH

Founder and CEO, InnovatorMD

"Incredibly engaging ... he always delivers a compelling, high-energy, informative presentation."

Debra Beauregard, MBA

Director, Medical Intelligence and Innovation, Children's Hospital of Orange County

Audiences he speaks to

Health system executives

Hospital boards

Physician and nursing leaders

Medical associations

Pharma and medtech teams

Digital health conferences

Universities and executive education

Aerospace and remote health

International healthcare AI panel, 2026. Organizer references are available on request.

Everything you need for the program

Formats

Main-stage keynote	30 to 60 min
Board or executive briefing	60 to 90 min
Fireside conversation	30 to 45 min
Panel or moderation	30 to 60 min
Leadership retreat or workshop	Half or full day
English, Spanish or bilingual	Any format
Virtual delivery	Any format

Stage introduction

Our next speaker is a board-certified emergency physician who has spent more than two decades on the front line of care. Known as DR GPT™, he helps healthcare leaders see which AI ideas can survive real clinical workflow, patient safety and physician adoption. Please welcome Harvey Castro, MD, MBA.

Customization

Thirty minutes with two of your clinicians before the event is worth more than any amount of slide polish. Share your workflow pain points and what your last AI session missed, and the talk is built around them.

Short bio

Harvey Castro, MD, MBA, known as DR GPT™, is a board-certified emergency physician, Advisor to the CEO of Phantom Space and healthcare AI keynote speaker. Thinkers360 ranked him #1 in its 2026 Top 50 Global Thought Leaders and Influencers on Healthcare. He has written AI books and given five TEDx talks.

Full bio

Harvey Castro, MD, MBA, known as DR GPT™, is a board-certified emergency physician who still practices after more than two decades on the front line. He is Advisor to the CEO of Phantom Space, a strategic advisor to NeuroCare.AI and the former CEO of Trusted Medical and PRIME Medical Staffing. Thinkers360 ranked him #1 in its 2026 Top 50 Global Thought Leaders and Influencers on Healthcare. He has written AI books, including titles with Wiley and Routledge, and given five TEDx talks. He served on Singapore's Ministry of Health Regulatory Advisory Panel from 2024 to 2026 and speaks English and Spanish.

A/V requirements and organizer assets

Audio

- Wireless lavalier or earset microphone, fresh batteries
- Tested backup microphone
- Handheld microphone for audience Q and A
- House audio that plays presentation video with sound

Visuals

- 16:9 projection or LED wall
- HDMI at the production position; event computer is fine, with a backup copy of the deck
- Confidence monitor showing the current slide
- Presenter remote with tested range
- Visible countdown or timing monitor

Stage

- Open stage for movement; lectern removed unless requested
- Front lighting suitable for photo and video
- Still water on stage
- Tech rehearsal before doors open

Download at HarveyCastroMD.com/media-kit

- High-resolution headshots and stage photos, all 2024 or later
- One-line, short and full bios
- Stage introduction
- Keynote descriptions
- 2026 speaker reel and five TEDx talks
- This press kit as a PDF

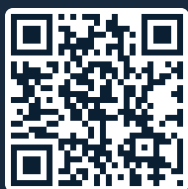

Please use the photos as supplied, without filters or retouching.

BOOK HARVEY

Bring practical healthcare AI to your audience.

Keynotes, board briefings, leadership retreats, physician education, panels and fireside conversations, in English or Spanish. Fees are quoted privately, and every date is confirmed in writing before it is announced.
