Before your next AI go-live

Seven checks, in the contributors' own words. Put a name next to each one.

- ☐ "Someone has to be named before a pilot can begin."
  Chris Hutchins
- ☐ "Do: write the exit criteria before the pilot starts."
  Sarah Matt, MD, MBA
- ☐ "Do: test every tool on your own shifts before you trust it at scale."
  Joshua Tamayo-Sarver, MD, PhD
- ☐ "After go-live, it must be monitored for performance drift, with clear authority to pause it."
  Prashant Mahajan, MD, MPH, MBA
- ☐ "Do: count the near misses."
  Patrick R. Coyle
- ☐ "If I ran an ED tomorrow, the first thing I'd do is put an ethicist on the AI governance table before a single tool goes live."
  Nneka Sederstrom, PhD
- ☐ "Disclosure costs us one sentence."
  Miguel Villagra, MD
