SIGNAL & STAGE

Gil Bashe

Healthcare leadership, AI accountability and patient and caregiver experience

Gil Bashe brings four decades of healthcare experience to conversations about AI, leadership and the human experience. His background spans health communications, public policy, executive leadership, journalism and patient advocacy. He examines what happens when innovation reaches patients, caregivers, clinicians, researchers and health organizations, and how leaders can reduce the friction that makes care difficult to deliver and navigate. His sessions address human judgment, accountability, clinical research participation, caregiver inclusion and the relationship between health outcomes and economic reality. He approaches these subjects from leadership, implementation and patient perspectives.

Topics to explore

- Digital Health Innovation Isn’t the Problem. It’s Friction
- Human First: Why People Matter in the Age of AI
- From Algorithm to Accountability: Leading AI Safely in Health Care
- AI, Clinical Trials and the Patient We Are Trying to Reach
- The Caregiver Is Part of the Care Team
- From AI Promise to Health Impact: Who Pays, Who Benefits and What Actually Works?

Plan the right session

Tell us who will be in the room, your event date and the question you want the session to address. We will discuss audience fit and confirm the speaker, format, duration and terms.
