SIGNAL & STAGE

Ranya Habash, MD

Healthcare AI, precision medicine and digital health innovation

Dr. Ranya Habash is an ophthalmic surgeon and health technology executive whose work spans medicine, product development, commercialization, enterprise partnerships and digital health regulation. Alongside 18 years in clinical practice, she has worked for Apple and Microsoft, founded three healthcare companies and been appointed to the FDA's Digital Health Network of Experts. She has held chief medical officer roles in enterprise technology and consumer health AI, mentors Stanford's physician innovators and works closely with global life sciences companies. As a builder and operator, Dr. Habash helps translate emerging technologies into clinically meaningful products and scalable care models. Her mission is to turn frontier technology into trusted tools that expand access to quality care. Her presentations connect what lies ahead with firsthand experience of making healthcare innovation work.

Topics to explore

- Healthcare AI and clinical workflow productivity
- Precision medicine and digital biomarkers
- Virtual care, telehealth and remote patient monitoring
- Digitally enabled clinical trials and life sciences R&D
- Healthcare regulation, compliance and trust
- Global health and equitable access

Plan the right session

Tell us who will be in the room, your event date and the question you want the session to address. We will discuss audience fit and confirm the speaker, format, duration and terms.
