

Kingspan **TEK**® Building System

STANDARD DETAILS FOR 142 MM STRUCTURAL
INSULATED PANELS

Fibre-free
Core

Kingspan®

*Low Energy –
Low Carbon Buildings*

Contents

Wall Details

- W1 Typical wall section.
- W2a Sectional elevation through soleplate fixing detail. Ground bearing slab.
- W2b Typical ground bearing floor slab with ventilated cladding.
- W2c Typical ground bearing floor slab with 140 mm block-work wall.
- W3a Sectional elevation through soleplate fixing detail – Suspended reinforced concrete slab.
- W3b Sectional elevation through wall junction with ground floor slab.
- W4a Sectional elevation through beam and block floor support.
- W4b Sectional elevation through beam and block floor support.
- W5 Plan showing typical wall connection detail. Corner & T-junction.
- W6 Typical window detail – brickwork external leaf.
- W7 Typical section at window cill – brickwork external leaf.
- W8 Typical section at window head – brickwork external leaf.
- W9 Typical window detail – polymer rendered cladding board with ventilated cladding cavity.
- W10 Standard external finishes.
- W11 Plan view of internal *Kingspan TEK® Building System* walls.
- W12 Typical separating wall section incorporating room in roof.
- W12a Section through typical separating wall assemblies.
- W12b Section through typical separating wall & floor assemblies incorporating trussed rafter roof.
- W13 Plan showing separating wall detail with brickwork external leaf incorporating flanking detail.
- W14 Sectional elevation of inlet / outlet e.g. for MVHR system
- W15 Wall hung boiler installation.
- W16 Gas + Electricity meter box installation.
- W17 External brick tie details for buildings not exceeding 4-storeys high.
- W18a *Kingspan TEK® Building System* single separating wall junction with external wall (plan view).
- W18b *Kingspan TEK® Building System* single separating wall junction – stepped external wall detail.
- W18c Lightweight frame internal wall connection onto *Kingspan TEK® Building System* single separating wall (plan view).
- W18d *Kingspan TEK® Building System* single separating wall junction – ground floor slab detail.
- W18e *Kingspan TEK® Building System* single separating wall junction – stepped ground floor slab detail.
- W18f *Kingspan TEK® Building System* single separating wall junction – separating floor detail.
- W18g *Kingspan TEK® Building System* single separating wall junction – internal floor detail.
- W18h *Kingspan TEK® Building System* single separating wall junction – room in roof detail.
- W18j *Kingspan TEK® Building System* single separating wall junction – trussed rafter roof detail.
- W19a *Kingspan TEK® Building System* external (flanking) wall junction with timber separating walls to Robust Details E-WT-1 and E-WT-2.
- W19b *Kingspan TEK® Building System* staggered external (flanking) wall junction with timber separating walls to Robust Details E-WT-1 and E-WT-2.

Floor Details

- F1 Section through typical separating wall & floor assemblies incorporating room in roof.
- F2 Section through typical separating wall & floor assemblies.
- F3 Separating floor detail. Platform frame. Non-Robust detail (pct) required.
- F4 Typical connection detail for engineered I-joist floor system.
- F5 Internal load bearing floor detail.
- F6 Alternative I-joist / wall panel connection detail fixed to rim board.

Roof Details

- R1 Typical eaves detail vertical section with **Kingspan TEK® Building System** pitched roof panel.
- R2 Internal roof support details at 40° pitch.
- R3 Typical roof panel overlaid ridge detail with & without support.
- R4 Typical ridge connection details.
- R5 Room in roof – dormer perspective & section detail.
- R6 Typical roof light detail.
- R7 Typical valley detail showing roof panels connected to valley rafter.
- R8 Typical hip detail showing roof panels connected to hip rafter.
- R9 Roof to roof – change in level detail.
- R10 Typical eaves detail vertical section with truss rafter pitched roof.
- R11 **Kingspan TEK® Building System** gable junction – truss rafter roof with insulation at ceiling level.
- R12 **Kingspan TEK® Building System** gable junction – **Kingspan TEK® Building System** roof panel.
- R13 **Kingspan TEK® Building System** external wall junction with warm deck flat roof – timber frame parapet wall.

Construction Details

- C1 Typical panel joints for **Kingspan TEK® Building System** wall panels.
- C2 Timber post panel joint.
- C3 OSB3 cassette panel joint.
- C4 Typical wall elevation with window & door openings.
- C5 Typical gable elevation with ridge beam pocket detail.

Miscellaneous Details

- M1 Standard fixings – sparrennagel, smooth ringshank nails & SIP screw.
- M2 Standard fixings – hangers & brackets.
- M3 Wall mounted services detail – electrical.
- M4 External fireplace recess & chimney.
- M5 Alternate external fireplace recess & chimney.

*NB These details offer general guidance and are not exhaustive, they have been compiled based on best practice and current information at the time of going to press. Please confirm these details are the current edition at the point of need by contacting the **Kingspan TEK®** Technical Service Department (see rear cover). The use of these details and their application remain the responsibility of the principal designer who should at all times verify their suitability, accuracy and likely performance with respect to their intended usage. Accordingly, Kingspan Insulation Ltd accepts no liability for any errors, omissions or claims arising from their use. For further advice on the application of these details, please contact the **Kingspan TEK®** Technical Service Department (see rear cover).*

Fixing Specifications

Application	Fastener Type	Spacing
Fixing soleplate or combined soleplate and bottomplate	Specification should be in accordance with project structural engineers' recommendations based upon geography and project foundation substructure	As per project structural engineers' recommendations
Panel straps to substructure / foundations	Specifications should be in accordance with project structural engineers' recommendations based upon geography and project foundation substructure	As per project structural engineers' recommendations
Fixing 50 mm x 110 mm bottomplates to soleplates	3.1 mm x 90 mm galvanized ring-shank nails	200 mm centres in two staggered rows
Fixing 15 mm x 100 mm OSB3 splines into Kingspan TEK® Building System panels	2.8 mm x 63 mm galvanized ring-shank nails	100 mm centres both sides of the panel
Fixing 50 mm x 110 mm bottomplates, headplates, end timbers, edge timbers into Kingspan TEK® Building System panels	2.8 mm x 63 mm galvanized ring-shank nails	50 mm centres both sides of the panel
Fixing 100 mm x 110 mm timber posts into Kingspan TEK® Building System panels	2.8 mm x 63 mm galvanized ring-shank nails	50 mm centres both sides of the panel
Fixing 110 mm x 150 mm bevelled headplate to Kingspan TEK® Building System panels	2.8 mm x 63 mm galvanized ring-shank nails	50 mm centres both sides of the panel
Fixing Kingspan TEK® Building System wall panels at corner joints	6.0 mm x 210 mm sparrennagel or 4.8 mm x 203 mm FastenMaster Headlok	Typically 300 mm centres for sparrennagel (4.0 mm dia. pre-drilled holes required.) Typically 350 mm centres for FastenMaster Headlok screws
Fixing Kingspan TEK® Building System roof sections at wall/floor junctions, ridge beams, intermediate purlins and gable walls	6.0 mm x 210 mm sparrennagel or 4.8 mm x 203 mm FastenMaster Headlok	Typically 300 mm centres for sparrennagel (4.0 mm dia. pre-drilled holes required.) Typically 350 mm centres for FastenMaster Headlok screws
Fixing joist hangers to headplate or laminated beams (fixings may vary depending on specification of joist hanger – please refer to manufacturers' instructions floor system)	3.75 mm x 32 mm square twist shank nails or Simpson N10 nails	Into side and top of headplate in locations marked out
Fixing I-beams / joist to joist hanger (fasteners may vary depending on specification of joist hanger – please refer to manufacturers' instructions floor system)	3.75 mm x 32 mm square twist shank nails or Simpson N10 nails	In pre-drilled holes for bottom flange
Fixing OSB3 / P5 floor decking to joists / headplate or header joist	2.8 mm x 63 mm galvanized ring-shank nails	Maximum 200 mm centres
Fixing rim board to headplate	Skew nail 3.75 mm x 75 mm round wire nails	150 mm
Fixing OSB3 / P5 floor decking to joists / rimboard	3.35 mm x 65 mm round wire nails	200 mm
Fixing brickwork cavity wall ties to Kingspan TEK® Building System wall panels	BTS 50 SCR tie / screw kits (Simpson Strong-Tie BTS 50 & ABC Spax 30 mm x 4.0 mm stainless steel flange head)	Varies with the geographical location of the building. Follow wall tie manufacturer's recommendations.
Fixing treated timber counter battens to Kingspan TEK® Building System wall / roof panels for ventilation	ABC Spax 5 mm x 60 mm or EJOT M5 70 mm stainless steel screws or equivalent (to penetrate through 15 mm OSB/3 face)	Typically 300 mm centres. For further guidance follow project structural engineers' recommendations

NB. Contact Kingspan TEK® Technical Services Department for further information. Heads of nail fixings should be flush with the surface of the OSB3 / P5 facing.

Notes:

1. For further information regarding soleplate / combination soleplate and bottom plate fixings and the requirement for additional panel restraint see Fixing Specifications (page 4)
2. Slab should be levelled and shimmed along line of walls to create a level platform for wall construction

Section through typical
separating wall assemblies
incorporating trussed rafter roof.

Date: 2/7/10

Drawn by: J.L. Scale: 1:25

NOTE:

When an appliance is not suitable for direct mounting on a wall panel it should be separated from the wall structure by a 75mm air gap or by 25mm of non-combustible material.

The latter is usually achieved by adding 12.5mm thickness of non-combustible board to the plasterboard lining.

Wall mounted boilers should be fixed to the wall panel as per boiler manufacturer's instructions using fully threaded screws.

A pre-formed opening is to be framed out using 50 x 110mm timber scabs nailed @ 50mm min. cts. to receive flue leaving a minimum 25mm gap all round. When twin walled flue is used the minimum distance is measured from the outer face of the inner flue.

Wall openings cut on site must be agreed with Kingspan Insulation prior to cutting. Generally opening should be cut central to wall panels & minimum 500 mm from top of panel.

– Fax: +44 (0) 1544 388 888
– email: customerservice@kingspantek.co.uk

Ireland – Tel: +353 (0) 42 979 5000
– Fax: +353 (0) 42 975 4299
– email: info@kingspantek.ie

Technical Advice

Kingspan Insulation supports all of its products with a comprehensive Technical Advisory Service for specifiers, stockists and contractors.

This includes a computer-aided service designed to give fast, accurate technical advice. Simply phone the Kingspan Insulation Technical Service Department with your project specification. Calculations can be carried out to provide U-values, condensation / dew point risk, required insulation thicknesses etc... Thereafter any number of permutations can be provided to help you achieve your desired targets.

The Kingspan Insulation Technical Service Department can also give general application advice and advice on design detailing and fixing etc... Site surveys are also undertaken as appropriate.

The Kingspan Insulation British Technical Service Department operates under a management system certified to the BBA

Scheme for Assessing the Competency of Persons to Undertake U-value and Condensation Risk Calculations.

Please contact the Kingspan Insulation Technical Service Department on the numbers below:

UK – Tel: +44 (0) 1544 387 382
– Fax: +44 (0) 1544 387 482
– email: technical@kingspantek.co.uk

Ireland – Tel: +353 (0) 42 975 4297
– Fax: +353 (0) 42 975 4296
– email: technical@kingspantek.ie

Literature & Samples

Kingspan Insulation produces a comprehensive range of technical literature for specifiers, contractors, stockists and end users.

The literature contains clear 'user friendly' advice on typical design; design considerations; thermal properties; sitework and product data.

Kingspan TEK® technical literature is an essential specification tool. For copies please contact the Kingspan Insulation Marketing Department or visit the **Kingspan TEK®** website, using the details below:
