

AI Artificial Intelligence KIOSK

AI KIOSK

Transforming Engagement: Your Brand's Virtual Representative, Anytime, Anywhere.

METaverse
911

Engage your potential exhibition booth visitors with our AI Interactive Kiosk. An AI Avatar Guides the Visitors on Company and Product Information.

This will allow your visitors quick access to your Company, Machines & Legacy Information. This Kiosk will act as a sales tool for your sales representative, ensuring quick sales cycles.

PROBLEM STATEMENT

- Exhibiting companies often struggle to provide consistent, personalized information to large volume of visitors at trade shows or events.
- Traditional sales presentations and static displays fail to effectively engage visitors leading to missed business opportunities.

KEY FEATURES

Can be trained on products, projects, and company profiles to offer tailored information

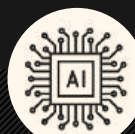

Communicates in multiple languages, ensuring accessibility for diverse audiences

Enhances customer engagement by guiding purchases through personalized responses

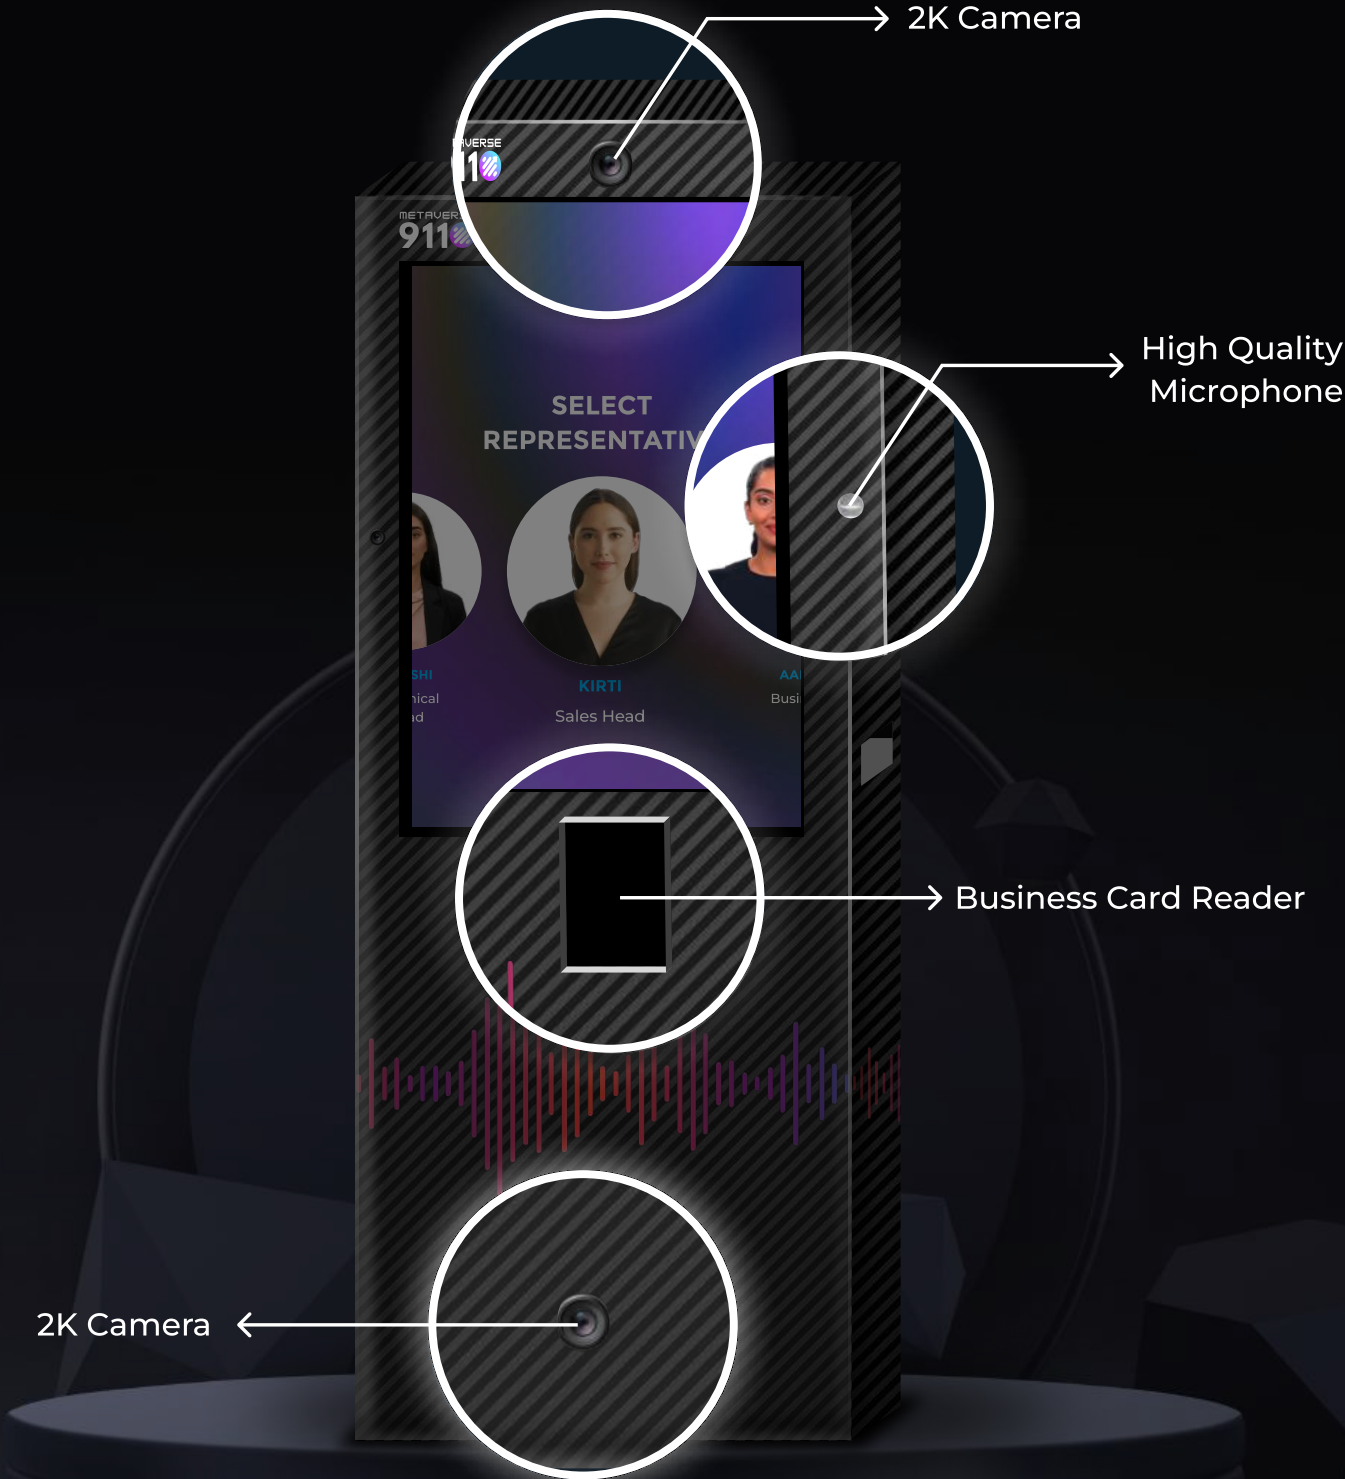

Robust design for reliable performance in high-traffic environments

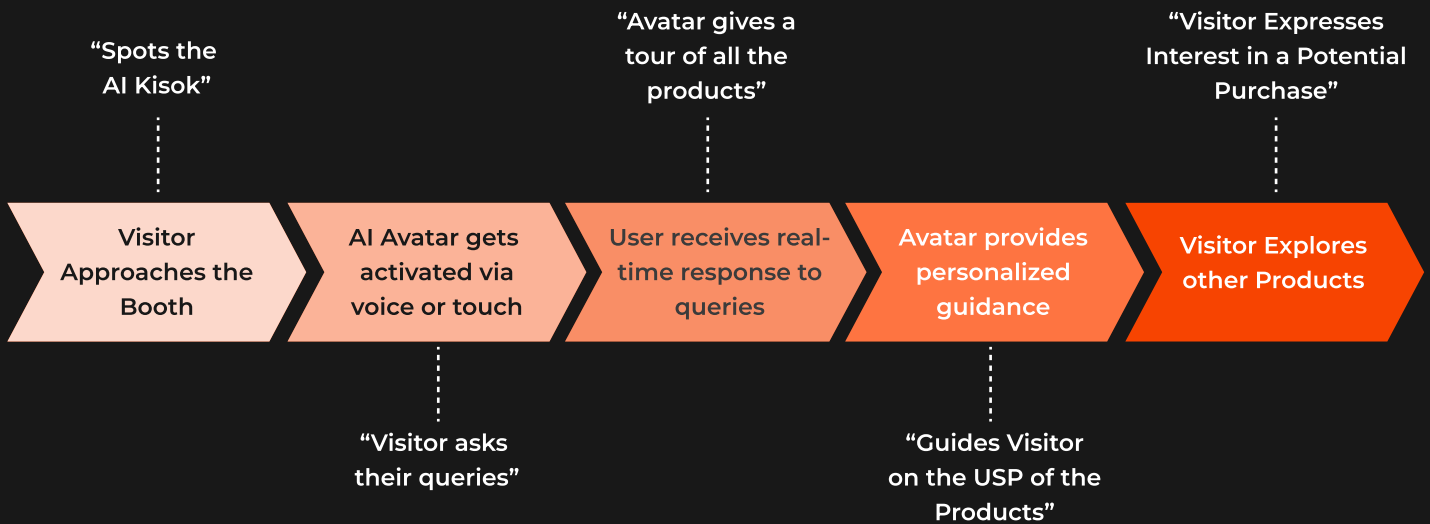

Smart AI algorithms for real-time, accurate responses to user queries

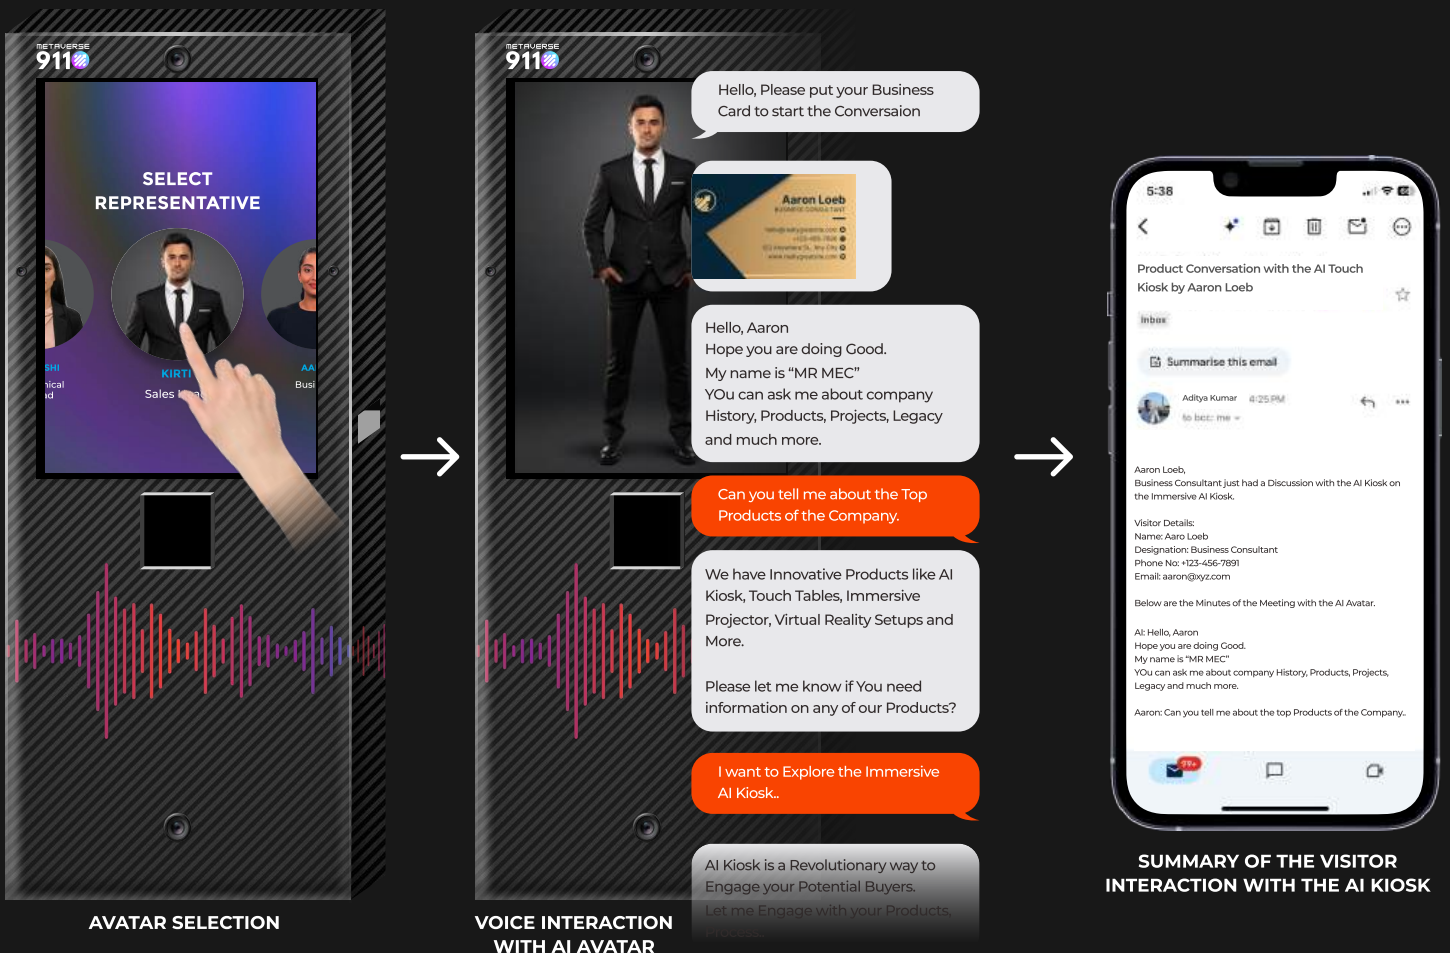

PRODUCT SPECIFICATIONS

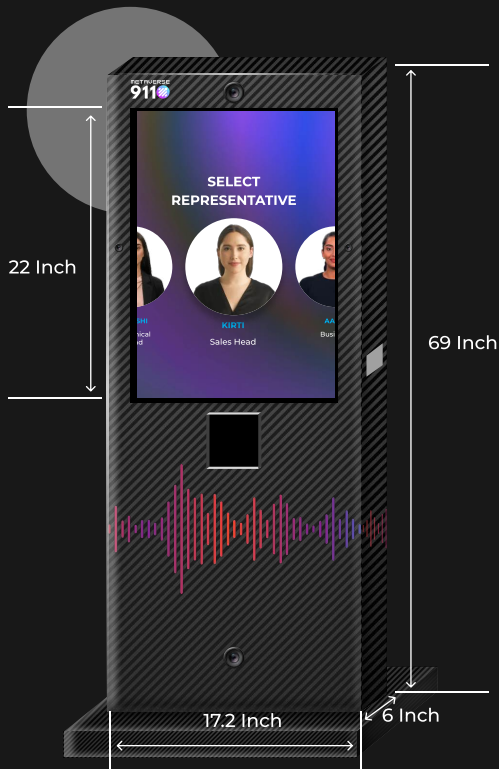

VISUAL JOURNEY

VISITOR INTERACTION

WHY CHOOSE THIS PRODUCT?

- Provides real-time, accurate responses to customer inquiries.
- Can be trained on product details, and company information.
- Engages diverse audiences by supporting multiple languages.
- Acts as a virtual brand representative by delivering interactive product demonstrations.

USEFUL IN EVERY WAY YOU CAN IMAGINE

Train your sales representatives on your products & offerings

Have your brand represented by a highly trained representative

Offer personalized assistance to each visitor on the showfloor

Educate customers on features and benefits of each product

Provide continuous assistance on product inquiries and FAQs

CUSTOMIZE IT AS PER YOUR BUSINESS NEEDS

- Tailor the avatar's appearance, voice, and interface to align with your brand identity.
- Train the AI Avatar on your specific offerings and business processes as per your needs.
- Choose languages that best suit your target audience for international exhibitions.
- Add unique functionalities such as advanced user analytics and lead capture for follow-ups.
