

Optimize corrugate usage and reduce shipping and packaging costs by selecting the smallest possible box for each order.

Overview

PackNet Cube is an advanced cartonization software designed to meet all cubing needs. It tackles the challenge of determining the best box size for orders by considering factors like nesting, void, and customer-specific logic. By optimizing corrugate usage and reducing empty box space, it helps businesses minimize shipping and packaging costs, ensuring the Packsize solution makes a perfect fitting box every time.

With fast and accurate cube calculations, PackNet Cube offers API accessibility, secure hosting on cloud hosted servers, and scalability for high order volumes. The software utilizes advanced algorithms and configurations to provide optimal dimensions, ensuring efficiency and cost-effectiveness.

PackNet Cube is a reliable solution that integrates seamlessly into existing workflows. It delivers accurate cubed results quickly, and offers configurable features to meet specific business needs. By streamlining operations and maximizing savings, it optimizes the packaging process for businesses across various markets.

Product Features

- API accessibility for easy integration with existing workflows
- Configurable rules engine accommodating padding, product void space logic
- Configurable to split orders across multiple cartons based off dimension limitations and container max weight
- Works seamlessly with Packsize solutions
- Accessible from anywhere in the world with reliable performance and uptime
- Compliant with industry standards for data security and privacy
- Scalable infrastructure capable of handling a variety of order volumes
- Fast, accurate cube calculations and optimized package sizes
- Reduction of shipping and packaging costs through optimal box selection
- Minimizes void filler and corrugated waste

Talk to an Expert

Our dedicated team of packaging specialists and engineers will apply their industry knowledge and expertise to help you reduce your carbon footprint, increase efficiency, and improve your overall packaging process flow.
