

PackNet Core delivers optimized carton production, efficient integration capabilities, and an improved user experience, providing critical capabilities needed for efficient Right-Sized Packaging On Demand®.

Overview

PackNet Core is an intelligent online software that optimizes packaging production, equipment integration, and process visibility. It enhances efficiency, quality, and sustainability, integrating with existing warehouse management systems. Pairing with PackNet Cube, PackNet Dim, and PackNet Report provides enterprise-class control and visibility over smart packaging processes.

Solution-Oriented Capabilities

- **Right-sized Carton Production:** PackNet Core manages, tracks, and reports performance in single or multiple machine environments. It adjusts box sizes and quantities based on order data, providing real-time visibility and optimizing productivity, quality, and efficiency in packaging operations.
- **Process Flow Optimization:** PackNet Core orchestrates, prioritizes, and scales box production based on demand, offering customization and scalability for each warehouse. It effortlessly handles complex workflows and batch environments, providing a flexible and scalable On Demand Packaging® solution.
- **Software Solutioning:** PackNet Core has integration capabilities for your WMS systems, automatically capturing item dimensions for shipments. This eliminates manual data entry and reduces errors, saving time and materials.
- **Machine Integrations:** Manage machine groups efficiently with PackNet software, prioritizing box production and sending orders to Packsize machines. Ensure accurate box style, z-Fold®, and induction point, while monitoring machine performance and status from a central dashboard on equipment, foot pedals, scanners, and more.
- **PackNet Software Platform Architecture:** PackNet Core is an intelligent online software driving speed and security for right-sized packaging production. It integrates with additional software modules: PackNet Cube, PackNet Dim, and PackNet Report.

Platform Features

- Cloud-hosted, multi-site and multi-machine platform
- Live Production Dashboard
- Optimized Carton Production
- Integration capabilities with customer ERP and WMS systems
- Workflow optimizations using Pick Zones, Cart Optimizations, and Classifications
- Machine support for X7, X5, X4, EM7, and IQ Fusion
- Support for Zebra printers, foot pedals, and other critical hardware

Talk to an Expert

Our dedicated team of packaging specialists and engineers will apply their industry knowledge and expertise to help you reduce your carbon footprint, increase efficiency, and improve your overall packaging process flow. Get in touch with us today to find out which Packsize solution is best for you.
