Dear club committee,

Please find attached a letter confirming the City's intent to not renew your existing licence

The City's decision to not renew is based on multiple factors including the below:

- Environmental and maintenance concerns
- A demonstrated a pattern of undertaking works and activities on public land without obtaining the necessary approvals.

Examples include:

- Installation and operation of an incinerator without approval.
- Excavation of a trench within the parklands for drainage purposes without approval.
- Installation of storage cabinets within a public picnic shelter without approval.
- Submission of an application for the City's Nature-Based Tourism Grant while indicating that all required permissions had been obtained when they had not. Recreational Services requested additional information regarding the proposal; however, this information was not provided before the application proceeded.

These incidents demonstrate a repeated failure to follow established approval processes and governance requirements associated with operating on City-managed land. Such actions increase reputational, operational and liability risks for the City and undermine confidence in the organisation's ability to comply with future licence conditions

Kind regards,

Recreation Services
