

Meet Luit

Your AI-Powered Excel-to-Google Converter!

Scroll down for more

The expert **your macros** always needed.

You know that colleague who just gets it? Who looks at a wall of VBA code and sees the business logic underneath?

That's Luit!

Fluent in Excel, fluent in Google, and genuinely enthusiastic about moving your data from one to the other.

Most Google Workspace migrations stall the moment they hit real automation - VBA macros, UserForms, Power Query pipelines. That's where the budget bleeds and the timelines slip.

Luit steps in exactly there

Converting your workbooks automatically, preserving every bit of business logic, and getting you to Google Sheets in minutes instead of months.

70%

Cost Reduction Potential

60%

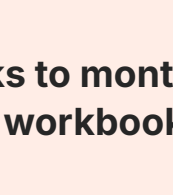

Conversion Accuracy Out of the Box

Minutes

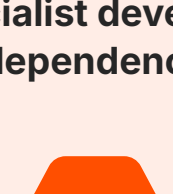

Per Workbook Not Months

What manual rewrite actually costs?

Manual Rewrite

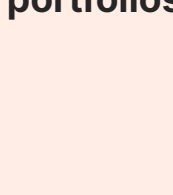

Weeks to months per workbook

Specialist developer dependency

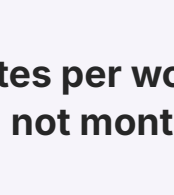

High logic error risk in translation

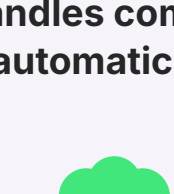

No scalability for large portfolios

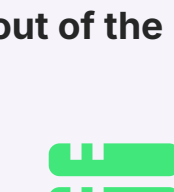

With Luit

Minutes per workbook, not months

AI handles complexity automatically

60% conversion accuracy out of the box

Scales to thousands of files

Upload

Your Excel workbook (XLSM, XLSB, XLSX, XLS).

Luit accepts the full spectrum of Microsoft formats.

Analyze

Luit reads the intent of your logic - not just the code.

AI classification assigns complexity tiers (XS-XL) and auto-generates requirements documentation.

Convert

VBA Macro Conversion

VBA → Google Apps Script with full object model mapping. Excel functions translated natively. Validated output.

UserForm Conversion

Rigid dialogs evolved into responsive HTML interfaces. All control types, event handlers, and google.script.run integration preserved.

Power Query Conversion

M-language extracted, data pipelines rebuilt as Sheets-native connections. Your insights keep flowing — without interruption.

Deploy

Google Sheets-ready output, auto-deployed.

Real-time progress tracking, code validation, and conversion analytics included as standard.

Built for enterprise scale.

Luit doesn't just handle individual workbooks. Luit is engineered for portfolio-level transformation:

Batch processing across thousands of files, complexity classification from XS to XL, automated requirements documentation, real-time reporting, and Google Sheets auto-deployment — all in one platform.

The full journey **Analysis & Inventory**, **Qualification & Planning** and **Conversion & Feedback** is covered end-to-end, with case tracking and deduplication built in.

Let Luit pave the way for your Agentic Enterprise

Why ZOI Business-Focused Techies

Luit has a team behind him.

Zoi brings over a decade of cloud expertise, premier partnerships with Google Cloud, AWS, Microsoft, and SAP — backed by 250+ certifications — and teams across seven countries with 40+ nationalities. We deliver globally, we work locally, and we stay until the solution scales.

Technology only holds value when it serves the people who use it. That's the principle Luit is built on and the standard we hold ourselves to.

Stop Rewriting. Start Converting.
