

ENTERPRISE LANDSCAPE ANALYSIS

Before you build, take stock

Too many decisions are made without a clear picture of what's running. Zoi's Enterprise Landscape Analysis brings clarity to fragmented IT environments: we reveal what's actively used, what's not used, but maintained, and how each part connects to your business, exposing complexity and hidden inefficiencies.

It's not just about documentation – it's about regaining control. Because every transformation relies on one thing first: understanding where you stand.

CHALLENGE

WHEN INSIGHT IS MISSING, CHANGE FAILS

You can't chart a clear transformation path without knowing your current enterprise landscape, just like a GPS needs your exact position before mapping the route. This lack of visibility often triggers a cascade of problems: organizations face misaligned investments, unexpected integration hurdles, and redundant or conflicting projects – resulting in wasted resources and missed opportunities.

Undiscovered applications and conflicting projects often introduce unwelcome surprises that derail project timelines and inflate budgets. In the end, these gaps frequently lead to failed initiatives or outcomes that fall short of expectations.

SOLUTION

PROVEN METHODOLOGY FOR STRUCTURED AS-IS ANALYSIS

We use a structured, data-driven methodology to uncover what's really running in your enterprise landscape. This includes a full inventory of business applications, mapped across ownership, interdependencies, and their alignment with business strategy.

We enrich this view through targeted data points, calculated indicators, and expert evaluation. From this, we generate actionable reports that reduce noise and highlight what matters. **The result: clarity, consistency, and control, empowering confident decisions – and making IT complexity finally actionable.**

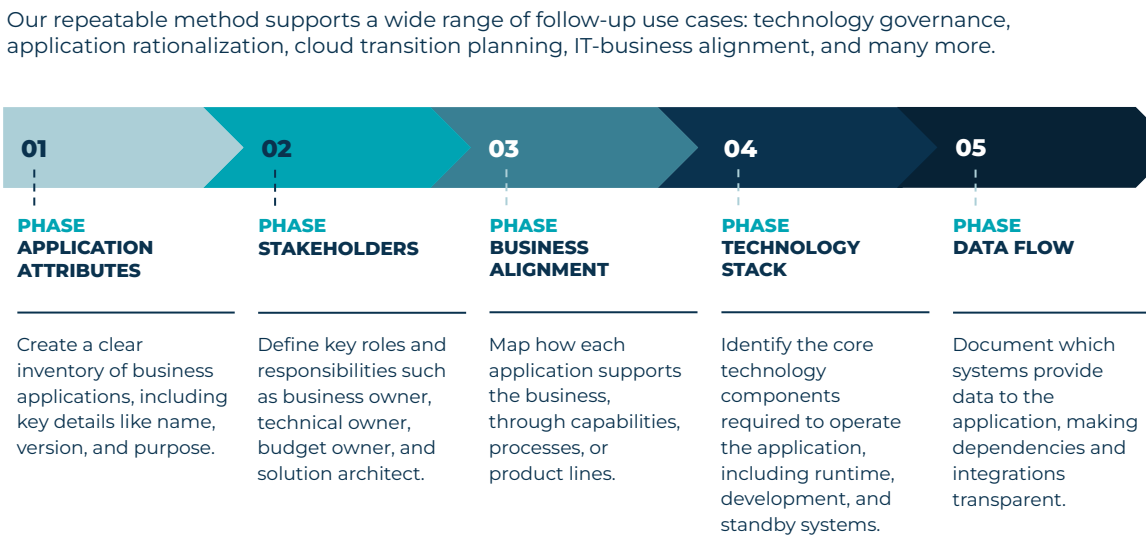

4 BENEFITS

THE VALUE OF KNOWING YOUR LANDSCAPE

1. Application clarity	2. Strategic fit	3. Stack visibility	4. Smarter decisions
Get a complete, structured view of all enterprise applications and their interdependencies.	See how your application stack supports key business goals, capabilities, and processes.	Uncover the technology stack, integration patterns, and ownership across your landscape.	Build the foundation for rationalization, governance, and confident transformation moves.

WHAT'S NEXT?

EASY FIVE-STEP APPROACH FOR EA LANDSCAPE ANALYSIS

WHAT YOU GET?

- 1. Proven methodology for application assessment:** A repeatable, structured approach for mapping your IT landscape.
- 2. Actionable insights based on structured data and defined indicators:** Evaluations that drive clarity, prioritization, and transformation readiness.
- 3. Full inventory of current application landscape:** Documented application attributes, interdependencies, and roles.
- 4. Use case-specific analytics and documentation:** Reusable outputs to support rationalization, cloud transition, and governance efforts.

WHY WITH US?

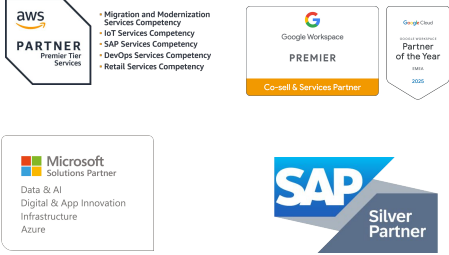

We love tackling complex landscapes. Our structured approach helps organizations cut through enterprise complexity to see what drives value, what drains it, and where to go next.

We don't deliver checklists. We translate complexity into strategic direction – with impact across business, tech, and transformation leadership.

ABOUT ZOI

Zoi is a leading cloud-native specialist and tech consulting company. Operating with a strong global presence across seven countries, Zoi combines local expertise with the power of world-scale innovation. Together with partners such as AWS, Google, Microsoft, and SAP, Zoi accelerates the digital evolution in manufacturing, retail, and healthcare: AI-driven, business-focused, and with the highest delivery culture.

With over a decade of cloud experience and more than 550 worldwide, Zoi develops innovative full-stack solutions in the public cloud.

LOST IN LANDSCAPE? WE'VE GOT THE GPS.
