

# Quality is timeless

## TANDEMBOX

A man in a blue polo shirt and orange cap is seen from the back, looking out a large window. To his right, a mirror on the wall reflects a young child wearing a similar orange cap, looking up and smiling. The scene is brightly lit by natural light from the window.

# The classic

More than 30 years ago, we laid the foundation for modern drawer systems with TANDEMBOX. Since then, this box system has been tried and tested millions of times and remains a firm favourite with cabinet makers and their customers – across generations. The reasons behind its success are obvious: outstanding quality, enhanced ease of use, timeless design and a versatile range that opens up a wealth of options and is suitable for all applications and living areas.

And we didn't stop there: over the past decades, TANDEMBOX has been continuously developed further and adapted to the requirements of modern living concepts. That is why you can still rely on TANDEMBOX today. More than ever.

## The success story continues

To date, TANDEMBOX has been sold hundreds of millions of times. What began many years ago has gradually developed into a sophisticated solution. Cabinet makers and manufacturers all over the world appreciate the feather-light glide, unique ease of use and versatility of the range, not to mention the outstanding manufacturing quality and reliability that TANDEMBOX has consistently delivered for generations – all thanks to comprehensive quality management and continuous development.

## Smooth motion and stability

The cabinet profile on low-friction cylindrical nylon rollers is at the heart of TANDEMBOX. Continuously refined over the years, it impresses more than ever with its feather-light glide and top-quality motion. Ease of use is further enhanced when combined with Blum's motion technologies, which we have also continuously improved.

And all this without compromise on stability or reliability, for the lifetime of the furniture – just as you have come to expect from Blum products.

**Mechanical**  
soft close

The adaptive soft-close mechanism for soft closing, independent of the weight of the drawer.

**Electrical**  
opening and soft close

With the electronic motion support system, even heavy drawers open as if by themselves.

**Mechanical**  
opening and soft close

One-touch opening and soft and effortless closing thanks to the integrated soft-close mechanism.

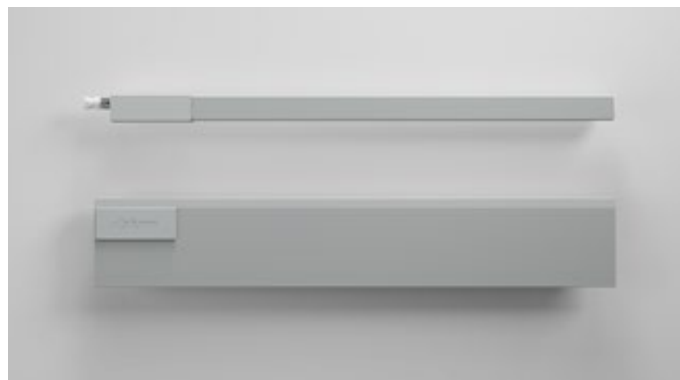

# Design that strikes a chord

From the very first drawer side design to its current form, TANDEMBOX has always kept its focus on what truly matters: a drawer that does more than just provide storage and that serves as a universal solution for all living areas, from the kitchen to the bedroom.

With a sleek, timeless design that feels just as modern today as it did back then.

# Where everything comes together

Thanks to its understated design with a rectangular gallery, TANDEMBOX perfectly enhances the personality of any furniture item.

All TANDEMBOX components (including nylon parts) are carefully colour coordinated, creating a harmonious overall look.

# Easy to make

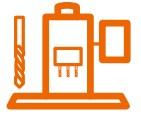

As with all Blum products, purpose-designed assembly devices are available for TANDEMBOX. Tailored precisely to your needs, they make manufacturing and assembly significantly easier both in the workshop and on site.

With the BOXFIX E-T template, for instance, assembling TANDEMBOX is a breeze. BOXFIX E-T is easy to use and perfect for screwing together the sides, base and back of the drawer.

Detailed information on our assembly devices can be found here:

[www.blum.com/assem2](http://www.blum.com/assem2)

## Quick to assemble

Thanks to the handy INSERTA technology, the gallery and the front can be connected without tools.

Clip the gallery onto the drawer back.

Easy tilt adjustment at the front of the gallery head for perfect gap alignment.

And you're done – simplicity itself!

See for yourself just how easy  
TANDEMBOX is to assemble:

# Ever-growing trust

Just as you can rely on TANDEMBOX, your customers rely on you to provide comprehensive advice, meet their wishes and find the best possible solution for their individual requirements.

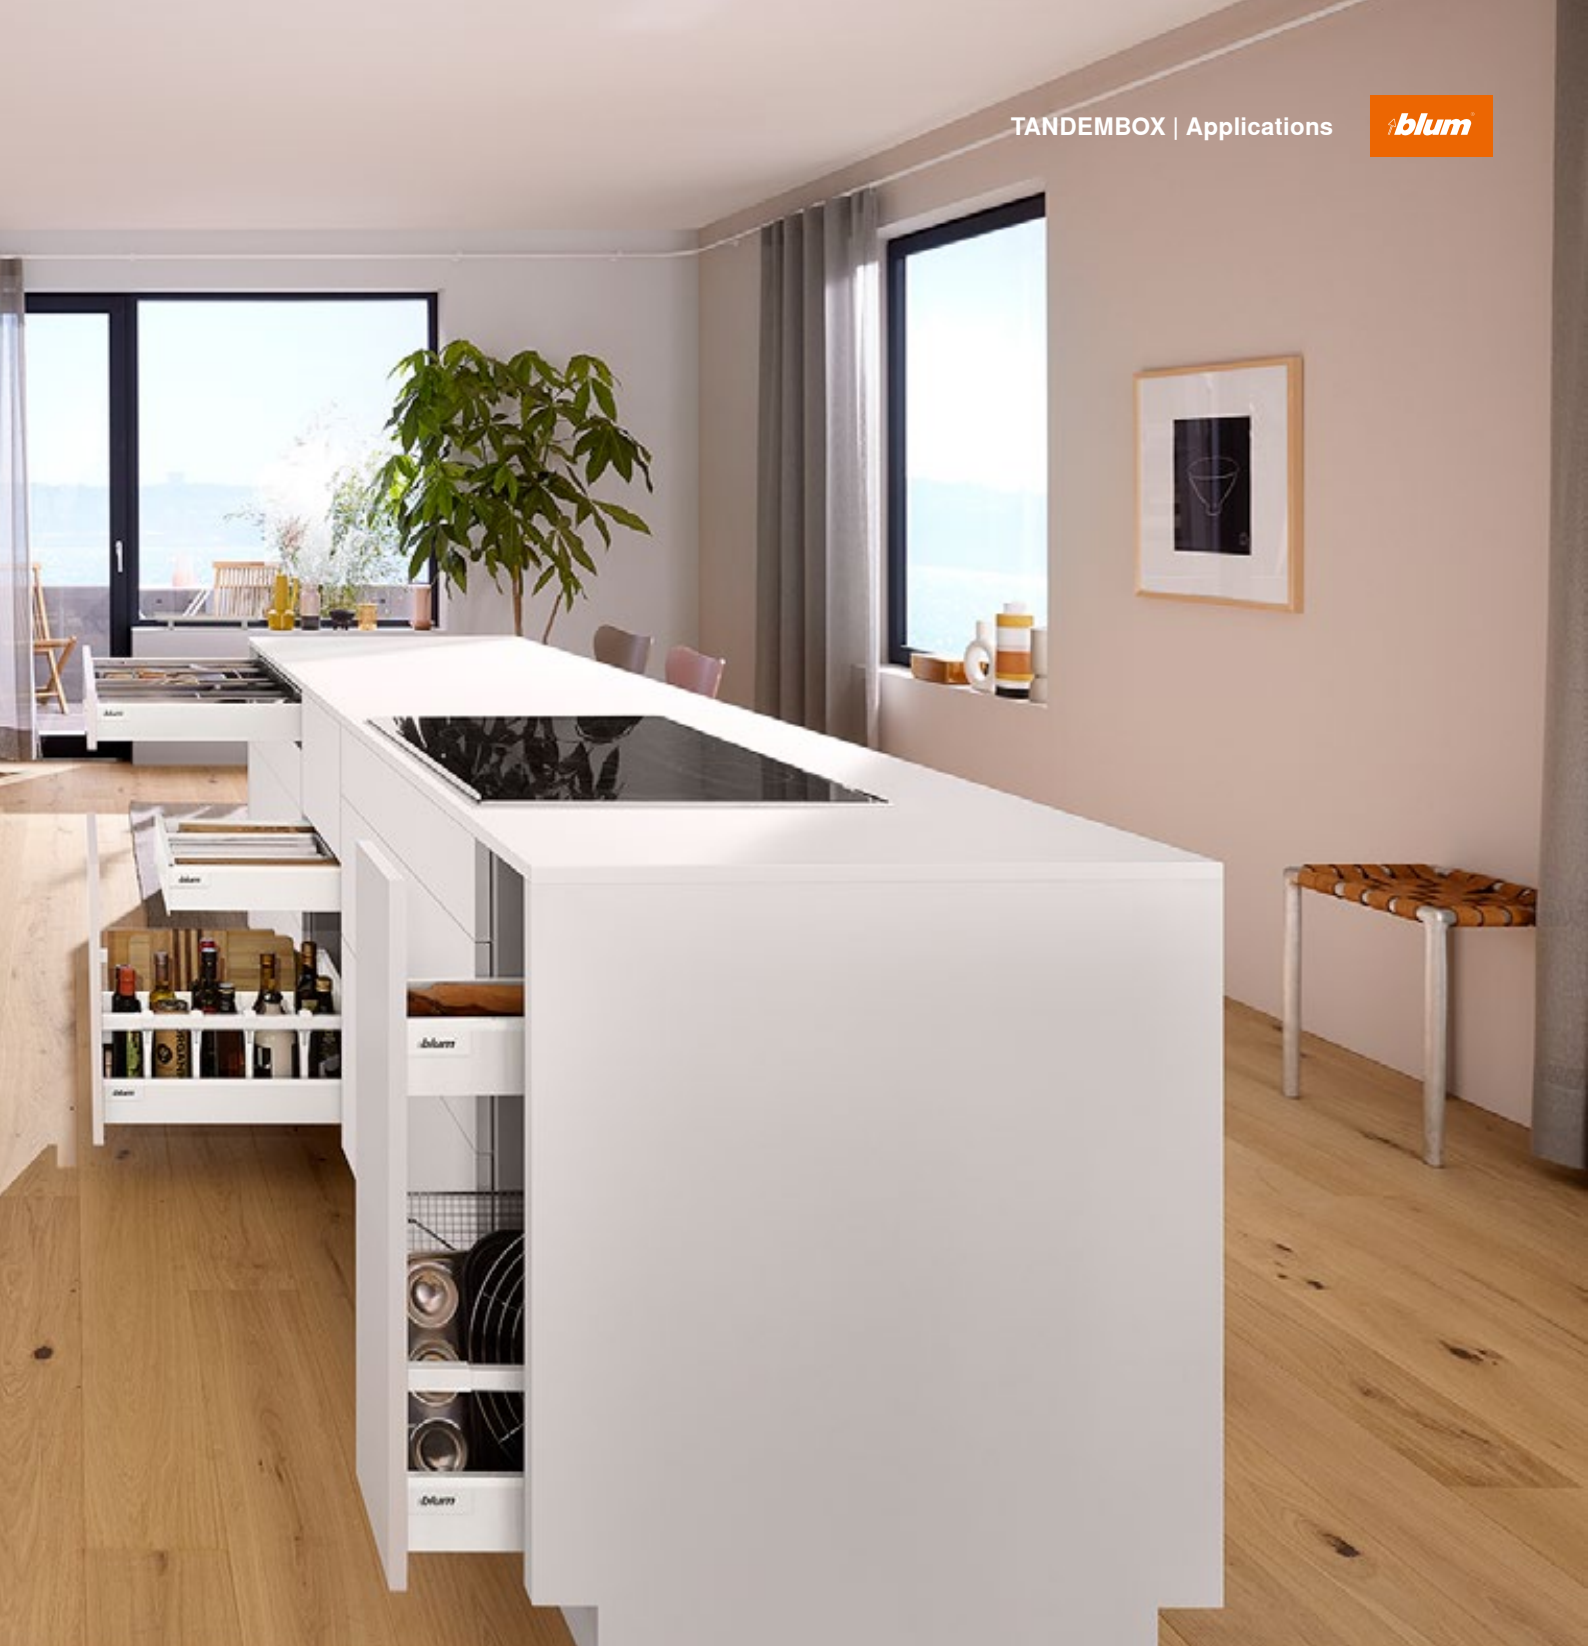

It's not just about quality and function. It's also about ambience and convenience. And that's what TANDEMBOX has embodied for decades. Day after day.

**A comprehensive  
range**

The TANDEMBOX range uses only a few components and yet it offers great versatility and flexibility: TANDEMBOX is available in a variety of nominal lengths and front heights as well as in two load bearing classes (30 and 65 kg).

This covers virtually all applications in all living areas, independent of the installation scenario and the existing arrangements. This means that TANDEMBOX allows you to meet any requirement and design things to suit your customers' exact needs.

### True to design

Happy customers, happy cabinet makers: everything turns out just as planned with TANDEMBOX. Everything is exactly where it should be, and every drawer fulfils its purpose.

### Peace of mind

The perfect space for living and working. And the reassurance that comes with knowing that you've made the right choice with TANDEMBOX. For many years to come – for the lifetime of the furniture.

# Fit for heavy work

TANDEMBOX can be easily adapted to individual requirements. It comes in two load bearing classes: 30 kg for narrow shallow drawers and 65 kg for wide, high-sided drawers. In other words, the box system delivers the right robustness and load bearing capacity to suit the application.

## Everything at a glance

The ORGA-LINE inner dividing system is hard to beat in terms of quality and flexibility. It's ideal for all TANDEMBOX versions with a rectangular gallery and delivers organisation to every drawer. Whether cutlery, pots, bottles or spices: ORGA-LINE keeps contents tidy and tailors storage space to users' needs.

Our range at a glance:

# Useful little helpers

We also take care of the details: ORGA-LINE kitchen accessories such as the film and foil dispenser, knife, spice and plate holder facilitate and simplify everyday tasks. They are always close at hand when needed – and just as quickly put away again.

## Extra storage space

TANDEMBOX allows you to create additional storage and make full use of the space available, for instance in a cabinet plinth, in narrow cabinets or right under the sink. Another option is a flexible larder unit that is surprisingly spacious (even when narrow in width).

# SPACE TOWER

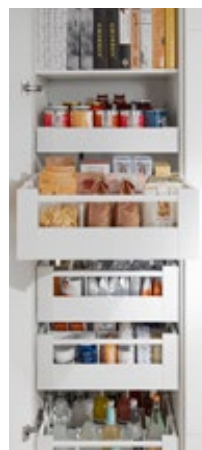

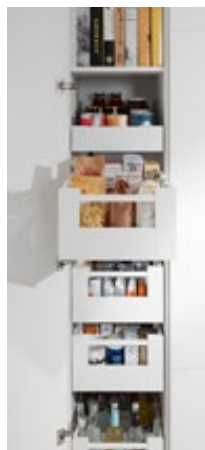

The ultimate solution for larger units: it comes in all heights and widths and offers loads of storage space. Practical by design: TANDEMBOX drawers can be opened individually so you can retrieve items from all sides. Even things right at the back can be accessed with ease – from the left, the right or the front.

Inner drawer height C

Inner drawer height D

SPACE TOWER comes in all heights, widths and depths, allowing storage space to be tailored to individual needs.

Find out more about SPACE TOWER here:  
[www.blum.com/tower638](http://www.blum.com/tower638)

# SPACE STEP

SPACE STEP can be equipped with TANDEMBOX to create extra storage space. The plinth solution is not just a practical step, but also provides storage for items that are not used on a daily basis. A clever solution, particularly when space is at a premium in small apartments.

Find out more about SPACE STEP here:  
[www.blum.com/step638](http://www.blum.com/step638)

# Little space? No problem!

## Sink cabinet

Not an inch wasted! A U-shaped inner drawer allows you to maximise the space to the left and right of the sink. Ideal for cleaning utensils such as sponges, cloths or bin liners – all stored neatly and securely with the ORGA-LINE inner dividing system.

### SPACE TWIN

The SPACE TWIN solution for narrow cabinets (with diagonally offset runners) turns narrow spaces into valuable storage, without compromising stability or quality of motion. This makes SPACE TWIN ideal for storing bottles, chopping boards, baking trays etc.
