

Jeffrey Olson

VICE PRESIDENT, COMMERCIAL
& CORPORATE DEVELOPMENT

Jeffrey Olson is the Vice President of Commercial & Corporate Development at Kairos Power, where he leads the company's commercial strategy, partnerships, and market-facing activities. In this role, he has been instrumental in supporting the development and execution of Kairos Power's key commercial agreements, including a landmark Master Plant Development Agreement with Google and the country's first binding advanced nuclear Power Purchase Agreement with the Tennessee Valley Authority (TVA).

Jeff brings two decades of experience driving strategic growth initiatives across the energy technology sector, with a focus on scaling emerging technologies from early-stage development to commercial adoption. Earlier in his career, he spent several years in management consulting, advising Fortune 500 companies on business growth, operating models, and systems development.

Prior to joining Kairos Power, Jeff led strategic partnership development and commercial operations at the artificial intelligence-driven energy storage company Stem, Inc., where he served as Vice President of Partner Operations. Before Stem, he held roles in corporate finance and international business development at Bloom Energy and was an executive in Accenture's Strategy Group, where he was a founding member of Accenture's Global Sustainability Practice.

Jeff holds an MBA from the University of California, Berkeley, along with a Certificate in Engineering & Business for Sustainability, and a B.A. in Economics from St. Olaf College.
