

## Dermatologists Urge People To Use Filtered Shower Water

Do you really know how clean the water coming to your home is? In reality, most tap water in the USA contains levels of copper, aluminum, chlorine, fluoride and bacteria. This seems intuitively correct as most people refuse to drink anything that hasn't been bottled or filtered. **In fact, a recent poll showed that 97% of people choose bottled/filtered water over a glass of tap.**

### 7 Shocking Facts About Tap Water

- 1 Cancer causing Chromium-6 has been found in more than 75% of US tap water supplies
- 2 Toxins in tap water can accumulate in the body for years, increasing the risk for developing cancer and all types of diseases.
- 3 Tap water rules allow for MORE Chlorine than what is in a public swimming pool!
- 4 Three quarters of all Americans live within 10 miles of polluted water.
- 5 The tap water of at least 41 million Americans has been found to contain a wide range of pharmaceuticals, including sex hormones and anti-seizure medicine.
- 6 Some old water pipes still contain lead, a poisonous metal. Lead may cause a range of health effects including behavioral problems and learning disabilities
- 7 The EPA's Safe Drinking Water Act (1974) regulates only 91 of the over 60,000 chemicals used in the United States.

It's no surprise that millions of people are investing in their health and spending money on water filters, bottled water, and expensive water delivery services. These devices are great, but they completely miss one giant problem. The water coming from our showers.

People forget that they are bathing in the very same unfiltered water they refuse to drink. Crazy right? "But I don't drink my shower water", you might say. Sadly, most people don't realize that our skin absorbs a lot more than we think. **Two-thirds of the harmful chlorine exposure actually comes from showering. ... A warm shower opens pores and allows a high rate of absorption.** Not only is our skin absorbing chlorine every day, but harmful metals and other bacteria.

Studies are now saying that unfiltered water can cause aging, dry skin, dry scalp, and irritates existing skin conditions. **Blue Jug has the shower heads that solve this problem for you.**

Immerse yourself in our Aroma Sense premier technology that revolutionizes your shower with vitamin C and captivating aromas. Using an Aroma Sense shower head gives you the ultimate spa experience. The spa-inspired water pressure will leave you refreshed and your skin nourished. Once you try our vitamin C shower heads, you will never look at showering the same again! Not only do you receive the relaxing effects of aromatherapy and vitamin C replenishment, you'll get a negative ionizer that delivers better water pressure and rust removal as well. Aroma Sense shower heads come in either handheld or wall-mounted options. They truly are exceptional shower heads.
