

**CFECapital announces the payment of the quarterly distribution of CFE FIBRA E  
for the second quarter of 2025.**

**Mexico City, Mexico, June 19<sup>th</sup>, 2025.-** CFECapital, in its capacity as Administrator of CFE FIBRA E — the only financial vehicle with access to the transmission sector in Mexico — informs its investor audience of the following:

As a result of operational and financial performance, the total distribution corresponding to 2Q2025 amounts to MXN 824.8 million, which will be delivered to certificate holders on June 30<sup>th</sup>, 2025, in strict accordance with the current Distribution Policy.

Accordingly, Series A Holders will receive the Minimum Quarterly Distribution (MQD) for the second quarter of 2025, along with the outstanding portion from the previous quarter. Likewise, Series B Holders will receive the full MQD for the current period, in addition to a partial distribution of the remaining balance from the prior quarter.

These results are driven by increased volumes of transmitted energy, the evolution of the transmission service tariff, and the continued investment in the National Transmission Grid, which strengthens the electricity system's infrastructure, ensures higher quality and more reliable service, and supports the consolidation of a sustainable long-term revenue base.

CFECapital reaffirms its commitment to responsible management and strong, transparent governance. In addition, it will continue to actively evaluate strategic opportunities that add value to CFE FIBRA E and its Holders.
