

Product & Experience

What is the "WhisperWings" experience?

WhisperWings is a premium, safety-first bedtime app for children (ages 3–9). It features three distinct content pillars:

Feathers

Rhythmic, magical bedtime stories.

Hushabies

Whispered, lullaby-style songs.

WhisperPedia Wonderings:

Gentle answers to "big" questions like *"Where do thoughts go when I forget them?"*

How does the app address the "Nightly Paradox" of screen time?

Traditional digital tools often overstimulate with "streaks," rewards, and bright blue light. WhisperWings features the **"Window of Wonder,"** slow-moving, hand-painted visual journeys that act like a nightlight rather than a firework, specifically designed to support melatonin production.

Is the app accessible to the visually impaired?

Yes. In a move rarely seen in the app space, we offer **Braille Ready Files (BRF)**. This allows children who read through touch to experience the world of WhisperWings on digital Braille readers.

Scientific & Clinical Efficacy

Why human voices over AI?

Research shows that mechanical AI voices lack the emotional richness and vocal alignment a child needs to feel safe. WhisperWings uses **Ora Murphy's** professional linguistic training to provide a subconscious signal of security, helping to soothe the 85% of school-aged children who suffer from nighttime anxiety.

How is the music created?

Unlike the synthetic, MIDI-based sounds common in sleep apps, our music is composed by **Emmy-winner Eric Harper**. Every track is recorded with real instruments and paced to the rhythm of a resting heart to naturally lower the listener's heart rate.

Company & Technical Specs

- **Multilingual by Design:** Stories are available in **English, German, French, and Spanish**. We believe multilingual exposure is a gift for a child's brain and empathy.
- **Privacy & Safety:** The app is 100% ad-free, has no games, and requires no internet once the stories are downloaded—making it perfectly safe for "Airplane Mode" use.
- **Leadership:** Founded by **Ora Murphy (Creative Heart)** and **Michael Murphy (COO)**. Michael actually heard Ora's voice in his BMW for years before they ever met and married, a true story of "hearing her before he loved her."
- **Pricing:** \$8/month or \$84/year.

Media Assets & Interviews

High-resolution images of our "Sherpas" (Luna, Wisp, Mahina, and more), audio samples of Ora Murphy, and interview requests for our founders or Emmy-winner Eric Harper can be directed to:
