SELECTED PRODUCT DESIGN PROJECTS

Self-directed concept work exploring adaptive systems and behavioral design. Full case studies at angelicajadedesigns.com.

Flowstate | *AI-Assisted Cognitive Workspace*

- Conducted 8 user interviews to understand how people manage tasks when attention and cognitive capacity fluctuate, reframing the problem from task organization to attention management.
- Designed an opt-in AI-assisted workflow that helps users capture, organize, and break down ambiguous tasks while maintaining user control over recommendations.

Anchor | *Behavioral Systems · Human-Centered Design*

- Designed an adaptive support experience that adjusts guidance according to changing user context during emotionally demanding moments.
- Used journey mapping to identify moments of uncertainty and introduced progressive disclosure to reduce decision burden.

Additional concept work: Horizon (state-aware productivity workspace adapting to attention needs), Clarity First (progressive-disclosure redesign of public benefits intake), and ARC (identity-based learning engagement replacing streak mechanics with capability-building).
