WYVERN

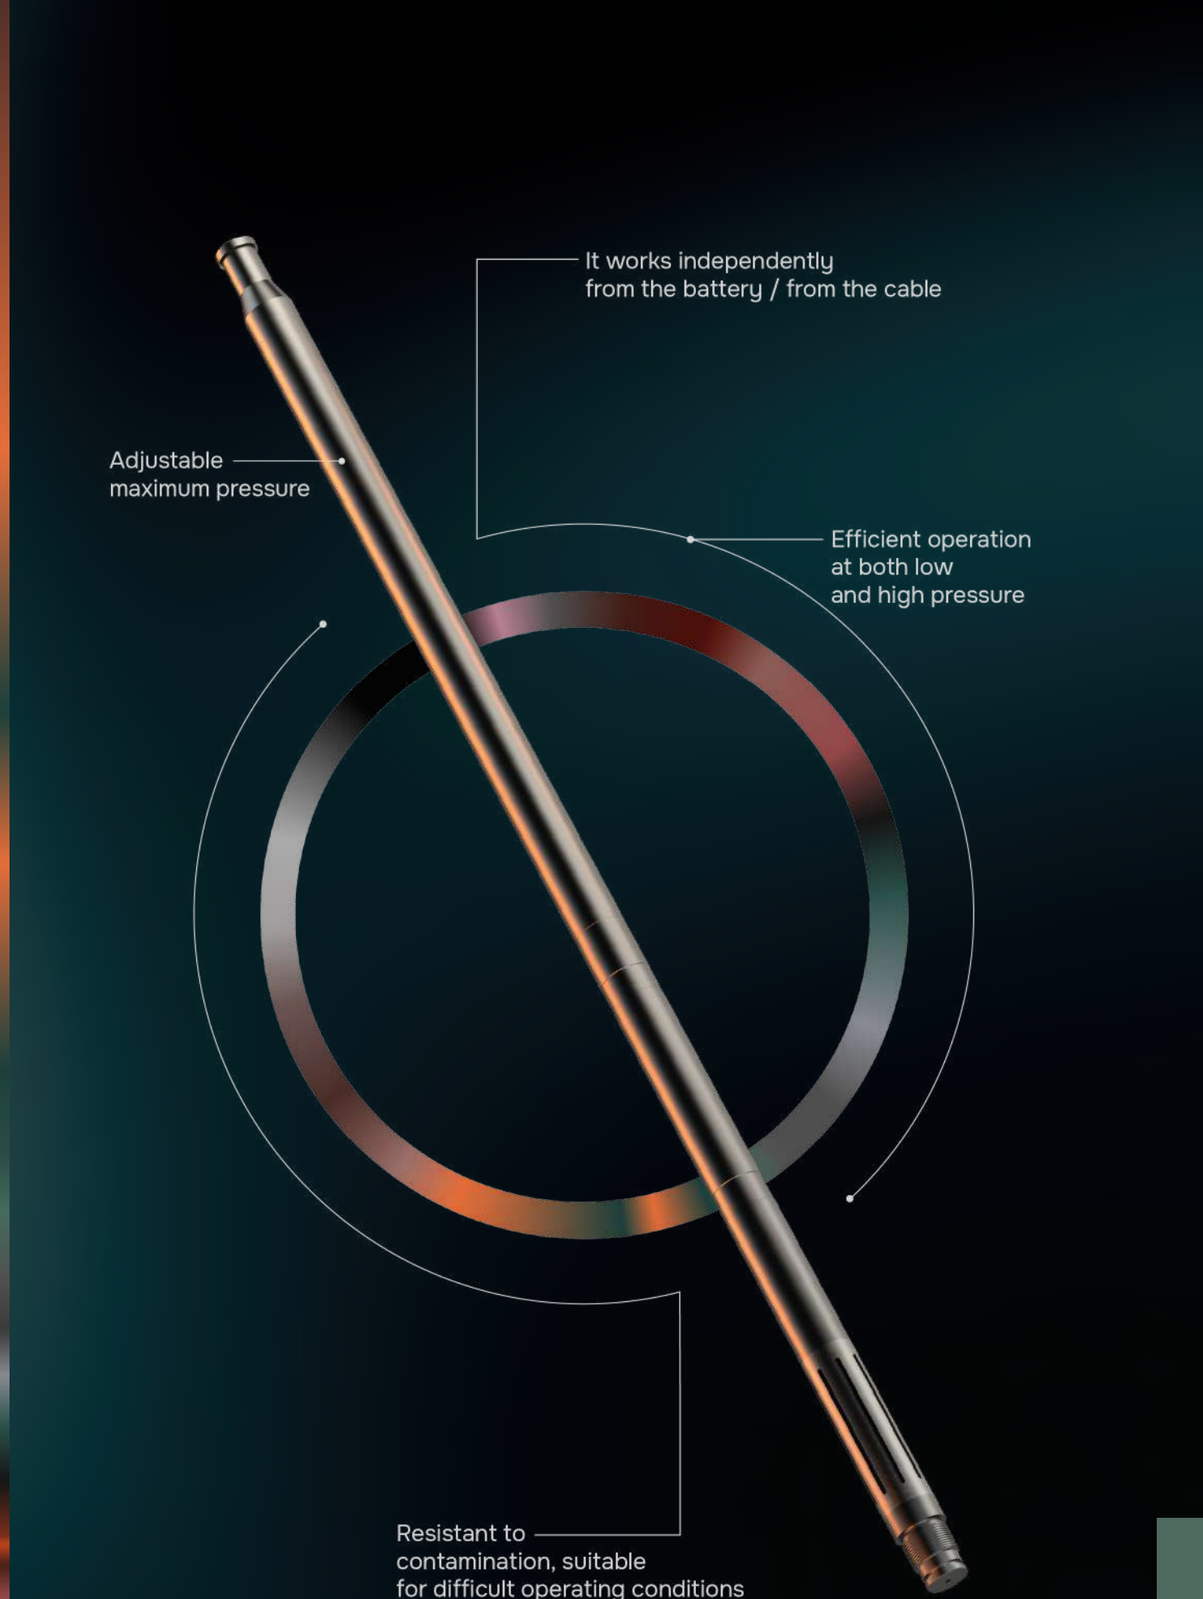

ELECTRONIC SETTING PUMP

DESCRIPTION

The Wyvern downhole pump is a compact battery pump with high performance, pollution–resistant design and adjustable outlet pressure to adapt to various operating conditions.

FEATURERS

- It works independently from the battery / from the cable
- Resistant to contamination, suitable for difficult operating conditions
- Adjustable maximum pressure
- Small dimensions make it easier to transport and use in a confined space
- Efficient operation at both low and high pressure

OD in – [mm]	Length ft - [m]	Liquid	Capacity Psi [bar] - lpm	QTY of battery sections Max pumping volume in liters [gallons]
2.125 - [54.0]	4.0 - [1.22]	From well	200 [13.8] - 1.5	2 - 40 [10]
2.5 - [63.5]	4.0 - [1.22]	From tank	1 500 [103.4] - 0.2	3 - 80 [20]
