

Watchit, Actisense collaborate on new Smart Collision Prevention System

October 08, 2024

The industry startup is using Actisense’s NGT-1 NMEA 2000 PC interface to make boating safer through better data

Watchit, an Israeli startup whose anti-collision technology is designed to prevent accidents at sea, has teamed up with Actisense on its new Smart Collision Prevention System with full NMEA 2000 integration.

By seamlessly integrating with existing sensors and leveraging advanced AI algorithms, Watchit constantly scans the surroundings, identifies potential hazards, and provides real-time alerts to prevent collisions. This innovative solution eliminates the stress of sailing, allowing boaters to fully enjoy their recreational activities without compromising safety.

Watchit constantly scans the surroundings, identifies potential hazards, and provides real-time alerts to prevent collisions

Actisense CEO, Phil Whitehurst, says: “We were immediately impressed by Watchit’s clever take on anti-collision. We are proud to be able to provide our NGT-1 NMEA 2000 PC interface as a means of helping seamlessly integrate their system with existing onboard NMEA-connected devices and systems.”

Similarly, Watchit is helping boatbuilders bring this technology to their customers too by presenting a unique opportunity for OEMs to differentiate their offerings and cater to the growing demand for advanced safety features.

safety features in the boating market.

By incorporating Watchit's advanced technology into their vessels, boatbuilders can provide customers with a first-of-a-kind collision prevention system that enhances the overall boating experience. This strategic partnership not only positions boatbuilders as industry leaders in safety innovation but also opens up new revenue streams and strengthens their competitive advantage in the market.

Commenting on why they chose to incorporate Actisense's technology, Watchit CEO Tal Duvdevany says: "Our collaboration with Actisense, a renowned leader in marine electronics, is a testament to our commitment to delivering the most advanced and seamless collision prevention solution for recreational boaters. By integrating with Actisense's NMEA gateway, Watchit can effortlessly interface with a wide range of onboard sensors and systems, ensuring a comprehensive and accurate understanding of the vessel's surroundings."

"This partnership not only streamlines the installation process but also reinforces our dedication to providing a truly intelligent and reliable safety solution that empowers boaters to enjoy their time on the water with confidence and peace of mind."
