

Points Testing Refresher

Aim

This course is intended for signal engineers, who are Works Location Verification and Functional testers, to become Trackside Equipment Verification and Functional testers.

Key Features

- Underpinning knowledge matched to the IRSE Functional Tester Licence
- Reflects the requirements of functional testing techniques
- Intensive practical experience in application logic testing
- May be tailored to specific client or railway administration requirements
- The course includes activities on relay based and Solid State Interlocking (SSI) systems.

Course Outcomes

- Perform Trackside Functional Testing on Points
- Running Through the Handover certificates
- Test Specification NR/L2/SIG/30014/D120/TS6-31.
Including filling out TC6 -31 Cert (RCPL)
- Test Specification NR/L2/SIG/30014/D120/TS6-21.
Including filling out TC6 -21 Cert (HW Machine)

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a practical and theory assessment. The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well prepared delegate is expected to

- Be able to perform location verification and functional testing
- Be able to understand wiring circuitry
- Have a knowledge of check marking

Practical Information

Duration: 1 day theory plus a one day assessment

Location: at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 6

This course is produced and run by Signet Solutions.

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown. *Available on an "open" basis, in which you can take individual places from our regular timetable.*

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order. *Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.*

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
