

Correlation

Aim

This course is intended for signal design engineers who need to be able to perform correlation work.

Key Features

- Correlation process in accordance with NR/GN/SIG/11115 – Correlation of Signalling Records
- All correlation activities can be rehearsed in a safe offline environment upon lifelike working equipment

Course Outcomes

On successful completion of this course, the delegate will be able to:

- Identify the importance of Team Leadership and Roles
- Make a safe Interface with the Working Railway
- Create a Method Statement for correlation activities
- Perform Condition Assessment and reporting
- Perform Arrival at Work Site activities
- Perform Inspection and Wire Counting of:
 - Locations
 - Equipment Rooms
 - Mechanical Signal Boxes
 - Control Panels (including Facia checks)
 - On-Track and Trackside Equipment
- Perform Earth Busbar checks
- Display Safe Working Practices
- Record correlation Results
- Perform Departure from Work Site activities

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a practical and theory assessment.

The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well prepared delegate is expected to be able to be able to understand wiring diagrams.

Practical Information

Duration: 3 Days + 1/3 Day Assessment

Location: at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 6

This course is produced and run by Signet Solutions.

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown. *Available on an "open" basis, in which you can take individual places from our regular timetable.*

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order. *Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.*

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
