

Supplementary (Back) Drives and Stretcher Bars

Aim

This course will enable signal engineers to carry out the set-up and adjustment of supplementary drives in line with relevant instructions. They will be able to demonstrate their ability both practically and theoretically upon successful completion of the course.

Key Features

- Enable candidates to demonstrate their ability to carry out the set up and adjustment of supplementary drives.(including NR/WI/SIG/10179)
- Enable candidates to be able to identify point components and associated parts so that the impact of correct setting is understood.
- Understand the importance of the correct setting of stretcher bars
- Provide sufficient evidence of an individual's performance to enable competence to be measured (in the workplace)

Course Outcomes

On successful completion of this course, the delegate will be able to describe the function of the following

- Points Population and Failures
- Identification of Components
- Supplementary Back Drives
- Installation
- Adjustments
- RT60 Installations
- Practical Demonstration

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a practical and theory assessment. The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well prepared delegate is expected to have a detailed knowledge of point operating mechanisms. This will have ideally been gained through workplace experience and relevant training on specific equipment (Style 63 Maintenance, HW Maintenance etc.)

Practical Information

Duration: 5 days for the course, which include an assessment of each delegate.

The assessment can be carried out at the customer's site if preferred.

Location: at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 6

This course is produced and run by Signet Solutions.

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown. *Available on an "open" basis, in which you can take individual places from our regular timetable.*

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order. *Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.*

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
