

Style HW Points Maintenance

Aim

This course will enable signal engineers to recall the principles of operation of the style HW machine and carry out the necessary tests and checks as defined in the Signal Maintenance Specifications. They will also be able to adjust the Style HW Point Machine to operational parameters and effectively locate faults. They will also be able to change component parts of the point machine

Key Features

- Underpinning Knowledge matched to IRSE Licences
- Intensive practical experience in applying the role of point fitting
- May be tailored to specific client or railway administration requirements

Course Outcomes

On successful completion of this course, the delegate will be able to describe the function of the following

- Principles of Operation
- Connection to Point Switches
- Machine and Component Variations
- Mechanical Operation
- Electrical Operation
- Mechanical Installation
- Rail Sections, Switch Types and Layouts
- Preparation and mounting of machine
- Connections
- Adjustment and Gauging
- Maintenance
- General
- Specific Services (A&B)
- Changing of Components
- Faulting

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a practical and theory assessment. The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well prepared delegate is expected to be able to read circuit diagrams and are involved the maintenance and faulting of Style HW point machines. Ideally they should have attended some basic signalling courses (BS1/BS2/Introduction to Signalling) or be able to demonstrate relevant experience

Practical Information

Duration: 5 Days

Location: at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 6

This course is produced and run by Signet Solutions.

For further information contact us:

enquiries@signet-solutions.com

www.signet-solutions.com

telephone: +44(0)1332 343585

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown. *Available on an "open" basis, in which you can take individual places from our regular timetable.*

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order. *Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.*

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
