

Signal Cable Jointing

Aim

This course will enable signal engineers to carry out jointing of typical cables and ensure that they are able to carry it out to the necessary installation standards. It will also cover the use of equipment such as crimping tools and different types of jointing kits to ensure the delegates gain a rounded ability.

Key Features

- Underpinning Knowledge matched to relevant IRSE Licences
- Intensive practical experience in applying the role of cable jointer
- Variety of joints used in the practical element of the course (Scotchcast, Heatshrink, etc)
- May be tailored to specific client or railway administration requirements

Course Outcomes

On successful completion of this course, the delegate will be able to describe the function of the following:

- Cable Construction
- Use and Testing of Crimping Tools
- Preparation of Cable
- Joint Construction and Types
- Sleeve
- Torpedo Type
- Wrapped
- Testing of cables prior to closure
- Closure of joints and final checks
- Installation standards (Installation Handbook)
- Final Testing and Restoration to Service

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a practical and theory assessment. The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well prepared delegate is expected to be able to use typical hand tools (Wire cutters, strippers, pliers etc) as well as having some experience of basic signal installation techniques.

Practical Information

Duration: 5 Days

Location: at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 6

This course is produced and run by Signet Solutions.

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown. *Available on an "open" basis, in which you can take individual places from our regular timetable.*

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order. *Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.*

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
