

## Relay Interlocking - Maintenance and Faulting

### Aim

This course is intended for staff who will be required to maintain and fault find on Standard Free Wired Interlocking in accordance with the BRS-SW-67 typical circuits.

### Key Features

The course benefits from significant practical time on a working interlocking at our training centre.

- The course includes assessments to demonstrate underpinning knowledge and practical skills.

### Course Outcomes

On successful completion of this course, the delegate will be able to describe the function of the following

- Understanding of circuits:
  - Push Button Interlocking
  - Route Interlocking
  - Points and Point interfaces
  - Sectional Route Locking
  - Aspect Controls and signal interfaces
  - Route Normalisation
- Panel Indications
- Maintenance Requirements
- Relay Reservicing
- Safe replacement of magnetically latched relays
- Logical Fault Finding techniques
- Common faults and their symptoms
- Fault finding exercises

### Assessment and Certification

Achievement of the Course Outcomes will be assessed by a practical and theory assessment. The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

### Pre-Requisites

A well prepared delegate is expected to have a good knowledge of typical circuits and understand the standard symbols and terminology used within them as well as having good understanding of signalling systems. This would typically have been built up by a reasonable amount of workplace experience or the candidates will have successfully completed a RRI Appreciation course (RI).

### Practical Information

Duration: 10 Days

Location: This course can be run at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 8

This course is produced and run by Signet Solutions.

## Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

### \*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown. *Available on an "open" basis, in which you can take individual places from our regular timetable.*

### \*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order. *Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.*

***This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.***
