

Signalling Control Tables

(Also known as Intermediate Signalling Technology Control Tables, ISTCT)

Aim

This course will enable signalling designers to create control tables for signalled routes and points, using standard control tables for Route Relay Interlockings.

Key Features

Course fully up to date to reflect current requirements

- The course concentrates on understanding of interlocking functionality, as well as “filling in the boxes”
- The delegate will benefit from experimentation on our demonstration interlockings
- Technical jargon is explained in clear English terms
- Also provides preparation for module 3 of the IRSE examination

Course Outcomes

On successful completion of this course, the delegate will be able to:

- Demonstrate an understanding of interlocking principles
- Complete control tables for signalled routes and points

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a theory assessment of interlocking principles and control table completion.

The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well prepared delegate is expected to be able to interpret signalling plans and show a basic understanding of signalling principles for UK main line signalling installations.

Practical Information

Duration: 5 days

Location: At our Derby training centre, or on your premises.

Maximum number of delegates: 10

The newly defined format for SSI control tables is specifically covered by our new SSI Control Tables course.

This course is produced and run by Signet Solutions.

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown.
Available on an "open" basis, in which you can take individual places from our regular timetable.

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order.
Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
