

Introduction to Signalling - BS1 and BS2

Aim

This course is intended for new people to signalling technology who requires development of basic signalling underpinning knowledge.

Key Features

- Reflects the requirements of the UK main-line network
- Ideal for people new to signalling technology
- Practical element ensures that understanding is re-enforced
- May be tailored to specific client or railway administration

Course Outcomes

On successful completion of this course, the delegate will be able to describe the function of the following

- | | |
|--|----------------------------------|
| • Signalling Diagrams and Nomenclature | • Signals and Circuits |
| • Block Systems | • Relays |
| • Point Operating Mechanisms | • Warning and Protection Systems |
| • Cables and Wires | • Train Detection |
| • Power Supplies | • Basic Fault Finding |

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a theory assessment and practical assessment.

The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Attending this course does not guarantee future employment.

Your employer must assess you as competent before allowing you to perform safety critical work.

Pre-Requisites

A well prepared delegate is expected to have a basic understanding of Electrical and Mechanical Engineering.

For the benefit of newcomers to the industry we also offer a combined course 'Introduction to Signalling – BS1 & BS2' and 'Signal Works Testing Mod 5 – Test Assistant' at a preferential rate. Please contact us for further details.

Practical Information

Duration: 10 Days

Location: at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 10

This course is produced and run by Signet Solutions.

telephone: +44(0)1332 343585

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown.
Available on an "open" basis, in which you can take individual places from our regular timetable.

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order.
Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
