

Level Crossing Installation

Aim

This course is intended for signalling installers and team leaders who are required to install the trackside components of typical manned and automatic level crossings.

Key Features

Understanding the requirements:

- Railway safety Principles and guidance
- Traffic Signs Regulations
- Level Crossing Orders
- Level Crossing Ground Plans
- Level crossing circuit diagrams

Electrical Installation and set-up of common level crossing components:

- Barrier pedestals and their control and proving circuits
- Barrier booms
- Road Lights and flasher units
- Audible Warning units and controllers
- Treadles
- Local Control Unit
- Power supplies and batteries

Course Outcomes

On successful completion of this course, the delegate will be able to:

- Plan installation tasks to ensure that the final installation will meet requirements
- Install and set-to-work common level crossing components.

Assessment and Certification

Achievement of the Course Outcomes will be assessed by an assessment of underpinning knowledge. The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well prepared delegate is expected to be a capable installer of general signalling equipment.

Practical Information

Duration: 2 days

Location: at our Derby training centre, or on your premises (subject to equipment availability)

Maximum number of delegates: 6

This course is produced and run by Signet Solutions.

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown.

Available on an "open" basis, in which you can take individual places from our regular timetable.

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order.

Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
