

Mod 4 – Functional Tester – Level Crossings

Aim

This course is intended for signal engineers, who are Signalling Works Functional testers, to become Functional testers for level crossing external equipment.

Key Features

- Understanding of level crossing equipment
- Undertake ground plan examination including road signage and markings
- Undertake testing of external level crossing equipment
- Intensive practical experience in level crossing equipment testing
- Implementing SWT (AHBC) Test specification requirements
- Identifying non-conformances
- The Course includes activities on an AHBC installation

Course Outcomes

On successful completion of this course, the delegate will be able to:

- Understand the more complex circuits associated with level crossing systems
- Perform inspection of level crossing ground plans
- Perform inspection and functional testing of barrier packs, road traffic lights, treadles and associated crossing equipment
- Record and Document test activities

Assessment and Certification

Achievement of the Course Outcomes will be assessed by a practical assessment.

The delegate's achievement of the Course Outcomes will be confirmed by a certificate which will be forwarded to the nominated client contact following the course.

Pre-Requisites

A well-prepared delegate is expected to:

- Be a competent Mod 3B(LX) tester and evidence of at least 2 years' experience
- Have a basic knowledge of level crossings

Practical Information

Duration: 4 Days + 2 Hour one to one Assessment Location: at our Derby training centre

Maximum number of delegates: 6

This course is produced and run by Signet Solutions.

Course Progressions

We offer many signalling technical courses, and it can be difficult to work out what's best for your needs. The following table will assist you.

*Development Courses in green text

These courses typically form the backbone of a career development path, and are usually taken in the order shown.
Available on an "open" basis, in which you can take individual places from our regular timetable.

*Supplementary Courses in blue text

These courses provide supplementary knowledge about a specific technology or process. They can generally be taken on an "as needed" basis, without any particular order.
Available on a "private" basis, in which you sponsor the delivery of a full course. This works better for four or more delegates.

This is just a quick guide – please consult our individual course specifications for more detailed information. Please ask us if you have any queries.
