

IMPACT REPORT

Friends of VOLIA,

Thank you for standing with us and the people of Ukraine throughout 2025. Because of your generosity and trust, lives were protected, communities grew stronger, and hope endured in extraordinary ways. In this year's Impact Report, you'll see how your support powered vital areas of our work: the UAble program providing wounded defenders accessibility and dignity, Emergency Evacuation Vehicles that supported families in crisis, and Anti-Drone Jamming equipment as well as power generators that kept responders and civilians safe. We invite you to read on and see the impact your donations as well as our plans for 2026.

Our Vision:

Sustained freedom and prosperity
for Ukraine

Our Mission:

To improve and protect lives in
Ukraine through impactful
programs

HERO

Oksana, Germany

On February 24, 2022, a text from Kyiv changed Oksana Mandryka's life. Safe in Munich, she felt shock and guilt. Within days, she turned purpose into action, raising funds for friends on the frontlines. Four years later, through Volia Fund and partner networks, her volunteer team has delivered \$2.1 million in aid: 96 vehicles, 112 drones, 209 radios, 29 Starlinks, and 56 generators. Every number means a mission made possible and a life protected. Oksana's transparency keeps donors close and trust strong. "\$25 can warm a soldier's feet," she says. "\$500 can keep a truck rolling toward safety." Each gift moves hope forward—one act at a time.

HERO Oksana

Behind every successful delivery there is documentation that list purchases, costs, and invoices. “Transparency keeps trust strong,” she explained. “Even though most donors know me personally, reporting is what sustains that trust over the years.” That personal connection, she says, “helps donors understand that their gifts go exactly where they should.” Across the diaspora, supporters respond not just to headlines but to humanity: real names, real needs, and clear results.

HERO

Tung, Portugal

Born in Ukraine to a Vietnamese family, Tung Fam has always called Ukraine home. When Russia's invasion began, he found a new way to serve—from abroad. Since 2022, Tung has mobilized donations through hundreds of micro-campaigns to supply Ukrainian defenders. He leads a Europe-based volunteer network that, with partners like the Blagula Bilen Foundation, sources, equips, and delivers lifesaving vehicles, drones, radios, antidrone devices, and more. For Tung, every delivery honors unseen heroes. "It's not a sprint—it's a marathon," he says, turning endurance into hope.

HERO Tung

Once inside the country, Tung's team, including Rita Sazonova and Anton Sazonov, takes over. They deliver vehicles directly to units when possible, performing repairs as needed, and coordinating delivery by other team members to ensure the vehicles reach the intended military units.

Today, after hundreds of hours refining their methods, Volia Fund's vehicle pipeline runs smoothly and transparently. Still, resources are always tight. "The challenge now," Tung says, "is not how to work, it's how to keep going fast enough to provide vehicles and supplies with limited funds."

Rita and Anton delivering a vehicle to the frontline of the war

HEALER

Yuliia, USA

A young veteran grips the parallel bars, testing a new prosthetic leg—his first steps shaky but determined. In that quiet, hard moment of recovery, UAble’s work begins. Founded by Yuliia Matvieieva, a clinician and mental health expert, UAble helps Ukrainian veterans heal body and mind together. Since 2024, it has provided prosthetics, rehabilitation, and psychological support for Ukrainian Defenders, including care for those with vision loss. Through partnerships with international clinicians, Ukrainian professionals gain lasting expertise. Yuliia’s guiding question—“If not me, then who?”—drives a mission that restores more than limbs. With your support, pain becomes purpose, and independence returns—one step at a time.

HEALER Yuliia

In 2025, the UAble initiative provided 111 months of rehabilitation for limb loss survivors, coordinated 5 humanitarian mission with US medical specialist teams and provided customized prosthetics for 7 Ukrainian Defenders with complex limb loss.

Ukraine Programs & Supplies

2026 STRATEGIC PRIORITIES

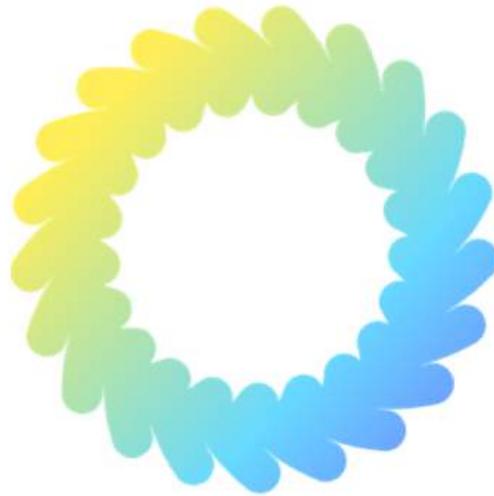

Ukraine based programs:

- Operationalize a fleet of 22 emergency evacuation vehicles
- Distribute 20 high-capacity power generation units
- Deliver at least 2,000 critical anti-drone components
- Support 100 mental health therapy sessions for defenders with vision loss
- Fund prosthetic fittings for 10 individuals to restore mobility and enhance quality of life
- Support 60 months of comprehensive, specialized physical rehabilitation
- Coordinate three medical missions of medical experts to work with Ukraine providers

US based programs:

- Partner with the Toloka Center to deliver three community-building initiatives
- Facilitate eight peer support group sessions for adolescents navigating transition to the U.S.
- Deliver four Ukrainian cultural heritage events to foster community engagement
- Design and implement six Ukrainian-language storytelling and literacy sessions for youth
