Welcome to Hybrid

A trusted partner in advanced dental implant care.

If you've been referred to Hybrid Dental Implants at Elmwood Dental, you're in the right place.

For over 30 years, we have been rooted in Rochester, helping patients understand their options and find lasting solutions to complex dental problems.

Founded by Prosthodontist Dr. Frank LaMar, who trained locally at the Eastman Dental Center, Hybrid Dental Implants was built with a commitment to this community and a standard of care that continues to guide everything we do today.

Your doctor referred you to us because your situation now requires a more advanced level of treatment, and they trust us to help guide you through it.

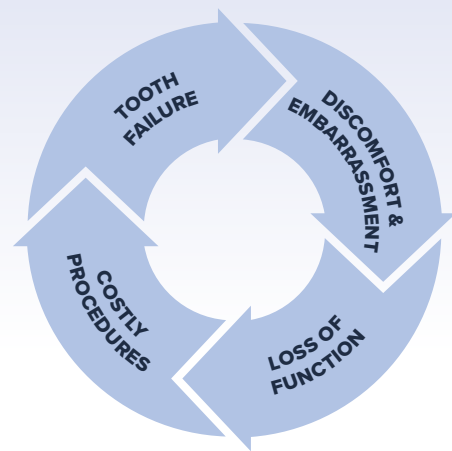

It all starts with a conversation.

We'll take the time to understand your situation, walk you through your options, and answer your questions so you feel informed and comfortable before making any decisions.

Whether your care involves a full-arch restoration or another solution, our goal is to help you restore your smile, function, and confidence so you can feel like yourself again.

Your dentist is still your primary provider. We work together to ensure your care is seamless from start to finish.

END THE CYCLE OF
DENTAL FRUSTRATION

To be completed by referring Doctor:

Patient Name:

Referring Doctor Name:

Referring Practice:

Practice Phone Number:

How long have they been your Patient?

Chief complaint of the Patient?

Do you need to consult one of our clinical directors about the patient prior to our consultation with them?

Yes No

Please attach the most recent x-rays if dated within the year. If none are available, we will take a panoramic X-ray and forward it to you.
