HYBRIDGE®
DENTAL IMPLANTS

A Healthy Smile Can Transform Your Life

Clear Answers.
A Plan Built for You.

If you've been dealing with failing teeth, missing teeth, or ill-fitting dentures, knowing what to do next can feel overwhelming.

At Hybridge Dental Implants, every treatment plan is built around your needs, your goals, and your long-term dental health. We start by helping you understand all your options before making any recommendations.

Why the Hybridge Approach is Different

For many patients, the difference is simple: they finally understand what's going on and what comes next. We take the time to listen, educate, and guide you through your options so you can move forward with clarity and confidence.

Our structured approach brings consistency to every step. From your first visit through your final restoration, your care is guided by an experienced team. They coordinate with skilled technicians at our Dental Laboratory in Rochester, NY, allowing for greater precision and more predictable outcomes, often resulting in a faster path to completion.

Your Smile, Your Path

Every smile is unique. That's why we use a Pick-Your-Path approach. We'll walk you through your options, explain what to expect, and help you choose the solution that fits your long-term goals and needs.

We understand a healthy, confident smile is an investment. During your consultation, our doctors will discuss the options specific to your situation and walk you through clear, all-inclusive pricing for each treatment path, so you know exactly what's involved. When you are ready to move forward, our Treatment Coordinators will guide you through financing options to help make your investment more manageable.

Whether you need to replace one tooth or an entire smile, you'll always have a clear plan and the support to move forward with confidence.

Your Path, Your Outcome

We'll work together to restore your smile, function, and confidence so you can feel like yourself again.

We'll help you understand which treatment options best fit your dental health, goals, and long-term needs.

Hybridge Full-Arch Restoration

Designed for patients missing most or all of their teeth or whose remaining teeth are no longer reliable. The Hybridge full-arch system replaces the entire arch with a bridge of 12 teeth supported by five or six dental implants.

This is often the right path for patients dealing with multiple failing or missing teeth, advanced decay, gum disease, or ill-fitting dentures that require repeated treatment. Instead of patching problems, this approach replaces one or both arches with a fixed, long-term solution designed for durability and function, giving you the freedom to move forward without ongoing dental concerns.

Why Hybridge

Faster, More Predictable, and Easier to Navigate

Hybridge full-arch dental implant treatment is a more streamlined solution compared to traditional multi-step approaches. Giving you a clear path forward with greater predictability and long-term confidence.

For many patients, temporary teeth are placed the same day as surgery, with the final restoration following within several weeks.

Every step of your full-arch restoration is planned so you know what to expect.

Our Proven 4-step process

1 **Initial Scans & Smile Design**

We use digital imaging to review your dental health and plan your new smile, so you know the final result before treatment begins.

2 **Surgery & Same-Day Teeth**

During your surgical visit, implants are placed, and you leave the same day with fixed temporary teeth, so you're never without a smile.

3 **Final Scan & Refinement**

After healing, we capture a final scan and make any necessary adjustments to ensure your smile looks and feels right.

4 **Your Final Restoration**

Your final set of teeth is placed and carefully adjusted for comfort, fit, and function, with guidance on how to maintain your smile long-term.

Conventional Restoration

If a conventional approach supports your long-term goals, we will help you decide which treatment path is best for you. Common options include:

Single Tooth Implant

A permanent, natural-looking solution that replaces a missing or broken tooth when nearby teeth are healthy.

Implant-Supported Bridge

A multi-tooth implant bridge replaces multiple missing teeth while preserving long-term jawbone health.

Dental Crown

Also known as a cap, this is a hollow, artificial tooth-shaped restoration that fits over a damaged or decayed tooth.

Why Patients Choose Hybridge

If you'd like to speak with one of our patients about their experience, just ask your Treatment Coordinator.

"I was afraid of the pain, and the noise of being at the dentist. But once I talked with Hybridge, I wasn't afraid anymore."

Sharon, Hybridge Patient

"My quality of life is far beyond what I could have imagined. Hybridge didn't just give me a new lease on life. This is like being reborn."

Brunswick, Hybridge Patient

"Now I can eat whatever I want, chicken wings, Italian bread, and steak. I'm so grateful I put my trust in Hybridge."

Tom, Hybridge Patient

"Everyone in my life has noticed that now I smile all the time, and don't cover it up anymore. Hybridge gave me my smile and life back."
