

SENSA

Narrative Agent

Generate consistent reports in seconds

Challenge

Drafting SARs is a slow and complex process. Report narratives can be inconsistent, varying in quality and detail, leading to a misalignment with internal policies and failing to meet FIU requirements. As SAR criteria becomes more demanding, the risk of non-compliance is becoming an increasingly critical issue.

Solution

Sensa Narrative Agent automates the creation of report narratives, generating highly consistent results in seconds. Trained on your policies and procedures, it seamlessly integrates into existing workflows to produce high-quality reports that align to exacting internal standards and FIU requirements.

Simplify SARs with intelligent automation

Streamline reporting

Significantly reduce the time taken to produce high quality, detailed SAR narratives. Sensa Narrative Agent incorporates all information identified by the investigator and other Sensa Agents, including any relevant documents and case artifacts.

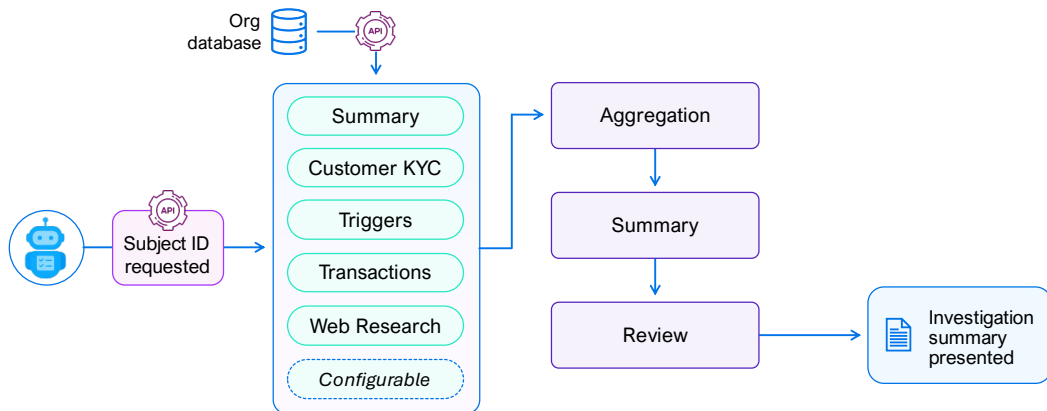

Improve SAR standards

Easily configure Sensa Narrative Agent so that report formats and content align to your exact requirements. Enable every SAR to reflect best-practice, even down to your preferred writing style.

Stay aligned to changing FIU requirements

When regulatory updates require your policies and procedures to change, Sensa Narrative Agent can be quickly adapted to reflect any new process or requirement, ensuring non-compliance is never a cause for concern.

Process flow

Personalized to suit your exact needs

Sensa Agents are pre-trained on compliance-specific tasks and tailored with your policies and procedures to ensure adherence to established processes.

Easily integrate into existing systems

Designed to easily integrate into third-party systems, Sensa Agents use open API architecture to seamlessly connect with diverse platforms.

Robust model governance

Transparency and auditability are built-in to Sensa Agents, ensuring regulatory compliance is never compromised.

Quickly scale when ready

Sensa Agents are designed to work with each other to optimize workflow automation. Add more Sensa Agents as you build trust in their performance.
