

SENSA

Web Research Agent

Automate comprehensive background checks

Challenge

Performing manual online research is slow and inefficient. Investigators waste hours sifting through irrelevant web hits, driving up costs and delays. As regulatory demands grow, the inefficiency and ineffectiveness of manual adverse media checks is only worsening.

Solution

Sensa Web Research Agent accelerates investigations by automating web-based background checks. Trained on your policies and procedures, it seamlessly integrates into your existing workflows to deliver detailed research packages for investigators to incorporate into their risk assessments. Save time, enhance consistency, and improve research effectiveness.

Streamline workflows with intelligent automation

Accelerate investigations

Save thousands of investigative hours by automating tedious manual tasks and resolve more cases in less time. Sensa Web Research Agent delivers deep subject research in a fraction of the time taken by a human.

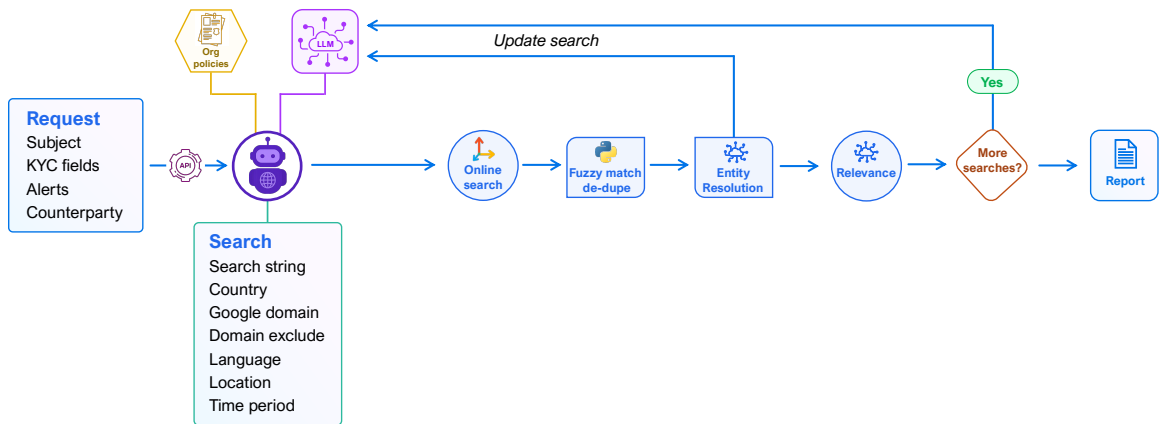

Reduce operational overheads

Sensa Web Research Agent works 24/7, 365 days a year to significantly improve operational efficiency. Enable resources, currently wasted on data gathering, to be reallocated to assessing and capturing real risk.

Improve research effectiveness

Access comprehensive research reports that can combine deep online research with internal data sources (e.g. KYC databases) and 3rd party data providers (e.g. D&B) to offer a highly consistent, best-practice approach to every investigation.

Process flow

Personalized to suit your exact needs

Sensa Agents are pre-trained on compliance-specific tasks and tailored with your policies and procedures to ensure adherence to established processes.

Easily integrate into existing systems

Designed to easily integrate into third-party systems, Sensa Agents use open API architecture to seamlessly connect with diverse platforms.

Robust model governance

Transparency and auditability are built-in to Sensa Agents, ensuring regulatory compliance is never compromised.

Quickly scale when ready

Sensa Agents are designed to work with each other to optimize workflow automation. Add more Sensa Agents as you build trust in their performance.
