

CoilLift®

The fully automated computer-controlled multi-coil cassette system.

The **CoilLift®** is an easy-to-use automated multi-coil cassette system that allows you to load up to 7 different channel letter coils with ease. Its remote controlled up and down stop feature quickly lets you change over between coils with just the push of a button. Plus, its automatic shut off features help reduce worker error and operational accidents. Best of all, the simple, yet sturdy design with built-in casters let you move from one **ChannelBender®** machine to the next.
