

# FOODPACK

## Tray sealers

The models of our FoodPack line are flexible packaging solutions, suitable for different product categories. To date, we have developed various technologies and options to facilitate the work process and optimise the relationship between machine and operator.

The preventative maintenance, the recognition of authorised personnel and the Anti-crush system are just some of the options available for our tray sealers. With these machines, ILPRA aims to provide customers a reliable and effective partner for their production, able to reduce consumption, increase productivity and guarantee product quality.

As each production is important and each product is unique, all our models are highly customisable.

- FROM SMALL TO LARGE PRODUCTION
- FOR ANY SECTORS
- EFFICIENT OPERATIONS
- SEAMLESS INTEGRATION
- COLOR TOUCH SCREEN
- EASY TO USE

## A WORLD OF POSSIBILITIES!

**SEALING ONLY**

**GAS FLUSH**

**STRETCH**

**VACUUM GAS**

**SKIN ON CARDBOARD**

**SKIN ON TRAY**

# FOODPACK Semi-Automatic

The semi-automatic models of ILPRA FoodPack line are best suited for small productions, without compromising packaging quality. They can be used for a variety of applications and ensure high-quality packaging, allowing the processing of a wide range of materials.

These machines are characterised by their ease of use, thanks to the intuitive colour touch screen panel, standard on every model, and the working method: the packaging process is carried out in sealing only, vacuum, modified atmosphere and Skin. The compact layout is an important space-saving feature and allows to maintain a large working environment. All models can be easily placed on any plane and/or can be integrated with a stainless steel base (standard starting from FoodPack 400). The motorised film unwinder and the quick mould changeover are essential for processing times, making the packaging process simple and repeatable.

- IDEAL FOR SMALL PRODUCTION
- STAINLESS STEEL (AISI 304 / AISI 316 L)
- FROM SIMPLE SEALING TO VG AND SKIN PACKAGING
- VACUUM PUMP INTEGRATED INSIDE THE MACHINE
- COMPACT LAYOUT
- QUICK MOULD CHANGEOVER
- ABILITY TO PACKAGE A WIDE VARIETY OF PRODUCTS IN VARIOUS MATERIALS
- PRINT REGISTRATION AS OPTIONAL

# FOODPACK Speedy Line

Thanks to their efficiency and ease of use, our FoodPack Speedy models are ILPRA worldwide excellence. Ideal for medium production, the Speedy line was designed to offer affordable and ambitious machines for those who require a quick and precise work cycle.

Due to its efficiency, flexibility, durability, cost-effectiveness of the investment and operating costs, this model is an intelligent choice. A wide range of applications are possible, from sealing only to vacuum, MAP and various types of Skin packaging. The touch screen panel is simple and intuitive, making the machine easy to use even for inexperienced personnel. In addition, the high degree of customisation allows the packaging of any type of product, and the maximum integration in a production line.

The models of the Speedy line differ in terms of configurations and special features such as mechanical movements, sealing area, sealing strength and loading area capacity. The Speedy is a reliable partner for your production, a guarantee proven by the hundreds of units sold worldwide every year.

- IDEAL FOR MEDIUM PRODUCTION
- WIDE LOADING AREA
- ENERGY SAVING
- CAN BE INTEGRATED WITH VARIOUS TECHS AS MULTIHEAD / DENESTERS / EXTERNAL DOSERS ETC.
- CHAIN MOVEMENT WITH SERVO MOTOR
- HIGH DEGREE OF CUSTOMISATION
- ON TRAYS AND ON CARDBOARD
- REMOTE ASSISTANCE
