

Explore. A day with Phil:

Every great project
starts with exploring.

Time to step back, look at the bigger picture
and see what's really possible for your space,
your light and the way it will feel.

A different perspective.

A day devoted to your project, looking at it
through a wider lens — architecture, landscape,
interiors, light, materials, movement and
atmosphere — and how they all come together.

We explore the opportunities and possibilities,
challenging assumptions and uncovering ideas
you may not have considered.

More than just light.

Light is considered from the start —
not as a product, but as a key part
of the design.

We explore how you want the space
to feel, what you want to see, what
should disappear and how daylight
and artificial light can work together
to create atmosphere and support
the way you live, work or relax.

30 years of experience. One day for you.

Phil brings more than 30 years' experience
of global projects, using perception techniques
to predict atmosphere and how people will feel
and respond to a space.

The day follows your project and your agenda.
It might be the start of a longer design journey
with us, or a highly valuable one-off, giving you
a clear direction and the confidence to move forward.

*"Our day with Phil was eye opening
and full of exciting ideas we never
would have designed on our own."
Phil you can use this in all your
marketing it was a 'genius' day."*

Private residential client, UK

*"It was the first time in the build we
became excited again about living in
the house. Phil explained what he called
'draining the swamp' after the months
and months of surveys, concrete, bat
surveys and bills we learnt to see and
think about our house with the energy
we had at the start."*

Private client, UK

Fresh ideas. Better decisions.

We look at the bigger picture and the finer
details, offering independent advice on design
ideas, lighting approach, controls, manufacturers
and what you can reasonably expect to pay.

The aim is to save you time, avoid costly
mistakes and help you make better decisions
at every stage.

A clearer project.

Ideas you hadn't considered.
Assumptions to question.
Opportunities to explore.
A better understanding of where
the money matters.
And the confidence to make
the next decisions.
